## General Overview

---

The **California College Promise Grant** application has a unique requirement in that two versions (years) of the application can be available during the same period of time. When a new version of the application becomes available for use, typically, the application from the prior year is still available for a period of time. The primary reason for this is because colleges have different periods for their academic year. Some academic years are fall through summer and others are summer through spring. A BOGFW year corresponds to the college's academic year.

'Fall to Summer' indicates Summer as a trailing term in awarding financial aid; the award year corresponds to Fall (Winter)-Spring-Summer.

'Summer to Spring' indicates Summer as a leading term in awarding financial aid; the award year corresponds to Summer-Fall-(Winter)-Spring.

Changes from year to year can include any combination of changes such as new or deleted questions, changes to business rules, new page(s), or changes to navigation rules. The differences from one Promise Grant year to the next are all related to the one field in the database, `year_code` (i.e. – the bogfw year).

## Database Tables

---

### Application Table

There is just one table for both in-progress applications and submitted applications:  
bogfw\_application

**Note:** See the Download Client User Guide for details on downloading BOG application data and [Appendix C: BOG Fee Waiver Application Downloadable Fields](#) for a list of downloadable fields.

NOTE: The student-facing application was re-branded to reflect the new California College Promise Grant Application name changes in January 2018. Internally, however, database fields and control table names have not been changed and may still reflect the original "BOG" or "BOGFW" data field names.

### BOGFW Year Table

The bogfw\_year table is a system-wide control table used internally by the application. It contains a row for each bogfw year with an indicator of which year(s) is active. The table contains the following fields and is updated annually:

year\_code (sequential number incremented for each new bog year. Used to populate same field in the application table.)

year\_start (The "from year" of the BOG year)

year\_description\_1 (Fall yyyy through Summer yyyy)

year\_description\_2 (Summer yyyy through Spring yyyy)

method\_b\_largest\_household\_size

method\_b\_income\_increment

method\_b\_income\_baseline

begin\_date (first date this application can be used)

end\_date (last date this application can be used. Null means no end date).

term\_code (5 characters. Always contains the highest year of the description.

Example: if year\_description\_1 is Fall 2016 through Summer 2017, the bog term\_code is "2017").

### The Academic Year Defined

The CCCApply standard application's internal college table contains an academic\_year field that is associated with the Promise Grant (BOGFW) application year. This field contains a value of 1 or 2 which indicates the following:

1 = Fall through Summer

2 = Summer through Spring

**Note:** The `academic_year` code is selected and set by colleges in the Administrator application's College tab for the CCCApply application. Each college must ensure that this field is set to align with their financial aid award year. For more information, see the CCCApply Administrator User Guide.

## Method B Table

An internal system lookup table is used for Method B income eligibility. This is described in the section **Method B Flag, Algorithm, and Income Table**.

## Auto-Population & System-Generated Data

The following fields of the CC Promise Grant Application (BOGFW) auto-populate from the applicant's OpenCCC account:

- CCCID
- Last Name, First Name, Middle Initial
- SSN
- SSN Last 4 digits
- SSN Type
- Email Address
- Date of Birth
- Mainphone, extension and authorization for text
- Street address 1 and 2
- City
- State
- Postalcode

The following fields are system-generated and added to the application:

- The **app\_id** is automatically generated when the row is first inserted into the table.
- The **college\_id** is set from the **College** table based on the college the BOGFW is being submitted to.
- The Current Mailing address fields can be populated from the student's OpenCCC Account's permanent address fields in the same way as CCCApply (i.e. – by clicking the checkbox that indicates the addresses are the same).

**Address verification** for mailing addresses will be the same as in the CCCApply Standard application.

## Defining Promise Grant (BOGFW) Years

When a new Promise Grant (BOGFW) year is approved and ready to be used, a new entry is made in application's internal bogfw\_year database table. Once the begin\_date occurs the system will automatically make the year available on the Application Year page.

The example below uses the 2014-2015 BOGFW application to illustrate the Promise Grant (BOGFW) Academic Year options:

### Fall to Summer

1. Display the 2014-2015 BOG application through June 30, 2015.
2. July 1, 2014 - June 30, 2015 - display the 2014-2015 application
3. July 1, 2015 - June 30, 2016 - display the 2015-2016 application.

The Promise Grant (BOGFW) Academic Year indicator (Fall to Summer) tells the system to display the previous year's application (in this case, 2014-2015) through to June 30 of the new year (in this case, 2015) and then retire that application. On July 1, 2015 start displaying the new year's application (2015-2016) through to June 30, 2016. Repeat each year.

### Summer to Spring

1. Display the 2014-2015 BOG application through December 31, 2014.
2. January 1, 2015 - December 31, 2015 - display the 2015-2016 application.
3. January 1, 2016 - December 31, 2016 - display the 2016-2017 application.

**Note:** The internal application's Method B table will have new entries added for the new year with newly defined eligibility determination figures.

## Variables

The following variables are used in this specification and referenced in the screen mockups.

Variable Name	Description
bogyear_minus_1year	Subtract one year from the year_start for the year selected (see BOGFW year table).
23_year_date	Calculate 23_year_date to be January 1 of the year_start covered by application, minus 23 years. (e.g. – year_start = 2011 minus 23 years equals January 1, 1988).
tax_year (same as bogyear_minus_1year)	Subtract one year from the year_start based on the year selected.
begin_date	Year date_start based on the year selected. (2018-01-01)
end_date	Year date_end based on the year selected. (2019-06-30)
year begin	July 1 of the Promise Grant (BOG) "from" year (e.g. – July 1, 2018)
year_end	June 30 of the Promise Grant (BOG) "to" year (e.g. – June 30, 2019)

subject_name	For dependents, subject_name is "Parent(s)/RDP ". For independents, subject name is "Student and Spouse's/RDP "

## Promise Grant Application Flow

### College-branded Promise Grant Application

Each California Community College that adopts the online CC Promise Grant Application (CCPG) is provided a unique URL containing the college MIS code at the end. This is what distinguishes the college\_id in the submitted application database, as well as the Downloads server. The college-specific application is also branded with an image provided by the college (usually the college logo) which is placed in the header of the CCPG application portal.

Other than these two distinguishing characteristics, there is no other custom messaging in the CCPG for the college, including an introduction page, which was a feature of the legacy Xap BOG application. Therefore, all college-specific messaging about the online Promise Grant application is under the control of the college and must be added to the college website.

**The college must add an introduction section to their website.** The Apply button will navigate to the OpenCCC Introduction page.

This is a **sample** college Introduction page:

This is an application to have your ENROLLMENT FEES WAIVED. If you need money to help with books, supplies, food, rent, transportation and other costs, please complete a [Free Application For Federal Student Aid \(FAFSA\)](#) or the [California Dream Application](#) (for eligible AB 540 students) immediately.

Apply for BOG Fee Waiver

### Getting to the California College Promise Grant Application

Students will access your online CC Promise Grant Application **directly through your college website**. The applicant may also access this application from the “Money” page on <http://home.cccapply.org/>.

### OpenCCC Introduction Page

The OpenCCC Introduction page has minor modifications to the text as indicated in the mock-up below.

The system will keep track of the fact that this is a CC Promise Grant application and not an application to college. This is true for the “My Applications” page as well (see below).

This bordered message box will continue to appear on this page as well.

**Note:** OpenCCC is a new systemwide account. Accounts from our previous application system are not available. Please create an account if you have not already done so.

## My CC Promise Grant Applications Page

The My CC Promise Grant Applications page works similarly to My Applications for the CCCApply Standard application. From My CC Promise Grant Applications, the user can start a new application, resume an existing application that has not expired or review and print a submitted application.

## Application Pages

Application pages have the following dependencies. Tabs should be grayed out until the page is available based on the table below.

**Note:** All pages following the Application Year are NOT available until the user completes this page.

Once the year is selected and the Application Year page is complete the year field becomes disabled (i.e. – you cannot change the year once it is selected and saved.) It should also be noted that the majority of the time only one year will appear in the dropdown box.

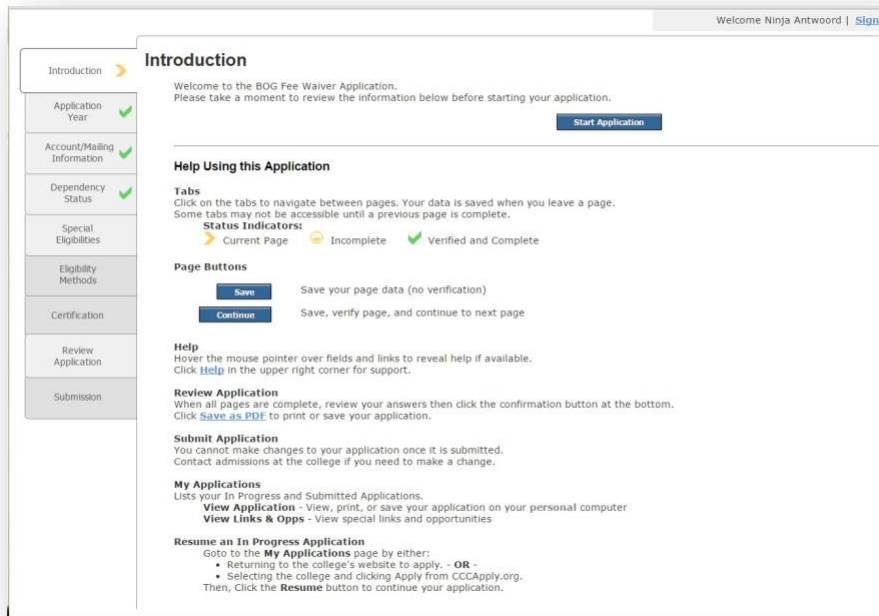

## Application Page Dependencies

Page	Depends on this condition
Introduction	No dependency
Application Year	User clicks Start Application on Introduction Page.
Account/Mailing	No additional dependency
Dependency Status	No additional dependency
Special Eligibilities	Dependency Status must be complete
Eligibility Methods	Special Eligibilities must be complete
Certification	All relevant pages must be complete
Review Application	All previous pages must be complete for the confirmation button to appear on the screen.
Submission	Review Application must be complete

The BOG dependency status is calculated when the Dependency Status page is completed. The new eligibility flag D is determined when the Application Year page is complete, and the temporary eligibility A is determined when the Special Eligibilities page is complete.

## Introduction Page

The first page of the application is the Introduction Page for the CC Promise Grant application.

## Application Year

The first entry page is the Application year. The following internal technical steps are required to present this page to the applicant.

- Query the bogfw\_year table using current date to determine the number of bogfw years that are active (available to applicants). The college table must also be queried to retrieve the academic\_year setting. The value displayed in the dropdown from the bogfw year table will be either year\_description\_1 or year\_description\_2 based on the academic\_year setting in the college table.
- If the count is one, pre-select the Bog Fee Waiver year to the one that is active and disable the dropdown.
- If the count is two, allow the applicant to select the year.

## Privacy Policy and Terms of Use

Links to the CCCApply *Privacy Policy*, and the current *Terms of Use* requirements can be found in the footer of every page of the online CC Promise Grant Application.

## Accessibility Page

The *Accessibility* page link appears in the footer of the CC Promise Grant Application. CCCApply is committed to making its online applications, including the Promise Grant, accessible to individuals of all abilities. The Promise Grant is developed to be in compliance with California Government Code 11135, which requires such technologies to meet the accessibility requirements of Section 508 of the federal Rehabilitation of 1973, as amended (29 U.S.C. Sec. 794d). Our goal is to make the CCCApply application accessible to everyone, including individuals with disabilities.

	<p><a href="https://www.openccapply.net/bog-welcome?">https://www.openccapply.net/bog-welcome?</a></p> <p>The value from the "&amp;user1" is stored in the campaign1 column for submitted applications (i.e. for the example above, the campaign1 column value in the database = collegeIntroPage, the "&amp;user2" value is stored in the campaign2 column, which will have the value advertOnGoogle), and so on.</p>
<p><i>Values - Labels:</i></p> <p><i>Notes:</i></p>	<p>In order to implement the campaign feature, when you create your URL for students to link to the CC Promise Grant application you must add the extra parameter of &amp;user1=x (where x = the name of your campaign) on to the end of the URL link. You can do this for up to three parameters, using &amp;user1=x&amp;user2=y and &amp;user3=z (where x, y and z = the names of other unique campaigns). For example, the format for implementing a URL for three campaigns would look like this:</p> <p><a href="https://www.openccapply.net/bog-welcome?cccMisCode=231&amp;user1=x&amp;user2=y&amp;user3=z">https://www.openccapply.net/bog-welcome? cccMisCode=231&amp;user1=x&amp;user2=y&amp;user3=z</a></p> <p>An example of the practical implementation of this format is:</p> <p><a href="https://www.openccapply.net/bog-welcome?cccMisCode=231&amp;user1=collegeIntroPage&amp;user2=advertOnGoogle&amp;user3=advertOnGoodM">cccMisCode=231&amp;user1=collegeIntroPage&amp;user2=advertOn Google&amp;user3=advertOnGoodM</a></p>

## California Community College ID

<i>Data Element:</i>	ccc_id
<i>Description:</i>	<p>The unique identifier for a single user's account. This identifier is assigned during account creation in OpenCCC. This field is passed as part of a submitted application to each college and is stored in the college Student Information System (SIS). This field can be used for student authentication when a student signs in at a college. It can be passed as an attribute to student statewide services so the service can verify the student has an OpenCCC account and perform automatic sign in. This field will also be passed as an MIS field.</p> <p>The user's unique CCCID for Federated Identity.</p>
<i>Format, Length:</i>	Character varying(8)
<i>Values:</i>	<p>The format of the ccc_id is:</p> <p>Positions 1 - 3: AAA thru ZZZ (Sequentially assigned beginning with AAA)</p> <p>Positions 4 – 7: 0001 thru 9999 (Sequentially assigned beginning with 0001 for each value in positions 1-3)</p> <p>Position 8: For future expansion if all values become exhausted.</p> <p><b>Note:</b> In positions 1-3, "I" and "O" are not used to avoid confusion with "0" and "1".</p>
<i>Allows Null:</i>	No. This is a system assigned field and is not entered by the user.
<i>Default:</i>	System assigned.
<i>Usage:</i>	<p>Used to uniquely identify an OpenCCC user account. This account can be used to apply to any participating college in the new CCCApply. It is also used for any additional student statewide services which use the ccc_id for authentication.</p> <p>Stored for use in Federated ID.</p> <p>Other possible uses TBD.</p>
<i>Notes/Constraints:</i>	<p>System-generated unique identifier.</p> <p>System will support expansion of CCCID to 8 characters (XXXXNNNN).</p> <p>Populates the CCCApply Standard and International applications and the Promise Grant (BOG) applications from the applicant's OpenCCC Account.</p>

<i>Prompt Text:</i>	<p>The Social Security Number is used as a means of identifying student records and to facilitate financial aid.</p>

The Social Security Number is required to claim tax credits for higher education costs known as the American Opportunity Tax Credit in accordance with the Taxpayer Relief Act of 1997.

Federal law requires the California Community Colleges to provide specific information to the Internal Revenue Service (IRS) for the purpose of filing an information return (IRS Form 1098-T “Tuition Statement”) for each student in attendance, with a few exceptions.

The information required by the IRS includes the student’s name, address, Social Security Number (SSN) or Taxpayer Identification Number (TIN/iTIN), and enrollment status, as well as the amount of tuition paid or billed, and scholarships received. (26 C.F.R. 1-60505-1(b)(2)(ii).)

Failure to provide a correct Social Security Number or TIN while claiming tax credits for specified education expenses may result in a penalty levied against the student by the IRS in the amount of \$100, per year, until the missing or incorrect information is provided (26 C.F.R. 1-60505-1(e)(4)).

In addition, California Education Code sections 68041 and 70901(b)(7) authorizes the California Community Colleges Chancellor’s Office (CCCCO) to collect information you submit through the OpenCCC Online Student Account and CCCApply Online Application for Admission for the purposes of completing and submitting California College admission applications and financial aid on your behalf.

Further, information acquired by the CCCCCO is subject to the limitations set forth in the Information Practices Act of 1977 (Title 1.8 (commencing with Section 1798) of Part 4 of Division 3 of the Civil Code). Compliance with these laws is identified in the *Privacy Policy*.

By providing my Social Security Number or Taxpayer Identification Number below, or by indicating that I do not have a Social Security Number or decline to provide one at this time, I confirm that I have read and understand the federal laws provided above, and the state privacy laws and regulations provided in the *Privacy Policy*.

## Appendix A: BOGFW Flag Algorithms

---

### Dependency Status

The BOGFW Dependency Status (`dependency_status`) is set according to applicant responses indicating dependent or independent status. The field is used to determine whether the application will ask for financial information about the applicant or the applicant's parent(s).

*If* `living_with_parents = "yes"` *then* `dependency_status = "D"` (Dependent).

*If* `born_before_23_year = "yes"`

or `married_or_rdp = "yes"` or `us_veteran = "yes"` or `parents_deceased = "yes"` or `emancipated_minor = "yes"` or `legal_guardianship = "yes"` or `homeless_youth_school = "yes"` or `homeless_youth_hud = "yes"` or `homeless_youth_other = "yes"`

*then* `dependency_status = "I"` (Independent);

*else if* `dependent_on_parent_taxes = 0` or `dependant_on_parent_taxes = 2`

and `living_with_parents = "no"`

*then* `dependency_status = "I"` (Independent);

*else* `dependency_status = "D"` (Dependent)

### Included/Excluded Questions

In many cases, whether a particular question will be asked depends on the setting of the Dependency Status. The algorithm for determining which questions will not be asked is given below. At download, data elements for unasked questions will be blank or null.

*If* `dependency_status = I` (Independent),

**Do not ask:**

Declared Dependent on Parent(s)' Taxes

Living with Parent(s)

Parent Receiving Assistance

Persons in Household – Dependent

Adjusted Gross Income, Other Income, Total Income – Dependent

If dependency\_status = D (Dependent),

***Do not ask:***

Persons in Household – Independent

Adjusted Gross Income, Other Income, Total Income – Independent

## Eligibility Flag

For computation of the final BOGFW Eligibility Flag, three temporary/transitory flags are used to track the outcomes of Method A, Method B, and Method D eligibilities separately and then to set the single final outcome for BOGFW Eligibility.

### Method A Flag and Algorithm

Method A eligibility determination is based on Yes/No answers to questions about receiving benefits and about special eligibility circumstances.

```

If tanf_calworks = "yes" or
ssi_ssp = "yes" or
general_assistance = "yes" or
parents_assistance = "yes" or
cert_veteran_affairs = "yes" or
cert_national_guard = "yes" or
cert_medal_honor = "yes" or
elig_sept_11 = "yes" or
elig_police_fire = "yes"
then elig_method_a = "Yes";
else elig_method_a = "No"

```

### Method B Flag, Algorithm, and Income Table

For Method B eligibility determination, an income table for the year of the Promise Grant (BOG) application is derived. (This table is internal, not displayed on the application form.) If the total income is over the cap for the number of persons in the household, the applicant is not eligible under Method B.

The **method\_b\_table** is an internally derived table using fields from the bogfw\_year table. The calculation is based on which year the applicant selects.

**California College Promise Grant Program - Part B 2019-2020 Income Standards\***

For the 2019-2020 application years, calculation of the maximum income is based on the table below.

Household size	Maximum Income for 2019-2020
1	\$18,210
2	\$24,690
3	\$31,170
4	\$37,650
5	\$44,130
6	\$50,610
7	\$57,090
8	\$63,570
<b>method_b_increment</b>	\$ 6,480

\* These standards are based upon the federal poverty guidelines, as published each year by the US Department of Health and Human Services. Under Title 5 of the California Code of Regulations, the student or student's family must have a total income in the base year (in this case, 2017) that is equal to or less than 150% of the U.S. Department of Health and Human Services Poverty Guidelines based on family size.

The base year is defined as the income year used for the determination of an expected family contribution (EFC) for federal Title IV student financial aid unless professional judgement is exercised by a financial aid office to use the current year income. These income standards are for the 2019-2020 academic year and are to be used to determine California Promise Grant Part B eligibility EFFECTIVE July 1, 2019.

**BOGFW-B Income Table from Previous Years**

For the 2018-2019 application years, calculation of the maximum income is based on the table below.

Household size	Maximum Income for 2018-2019
1	\$18,090
2	\$24,360

3	\$30,630
4	\$36,900
5	\$43,170
6	\$49,440
7	\$55,710
8	\$61,980
<b>method_b_increment</b>	\$ 6,270

For the 2017-2018 application years, calculation of the maximum income is based on the table below.

Household size	Maximum Income for 2017-2018
1	\$17,820
2	\$24,030
3	\$30,240
4	\$36,450
5	\$42,660
6	\$48,870
7	\$55,095
8	\$61,335
<b>method_b_increment</b>	\$ 6,240

For years 2016-2017, the calculation is as follows:

$$\text{maximum\_income} = \text{method\_b\_income\_baseline} + (\text{method\_b\_income\_increment} * (\text{household\_size} - 1))$$

Derived table for the **2016-2017** application year. The method\_b\_income\_baseline = 17,665.00.

Household size	Maximum Income for 2016-2017
----------------	------------------------------

1	\$17,665
2	\$23,895
3	\$30,135
4	\$36,375
5	\$42,615
6	\$48,855
7	\$55,095
8	\$61,335
<b>method_b_increment</b>	\$ 6,240

Derived table for the **2015-2016** application year: the method\_b\_income\_baseline = 17,505.00.

Household size	Maximum Income for 2015-2016
1	\$17,505
2	\$23,595
3	\$29,685
4	\$35,775
5	\$41,865
6	\$47,385
7	\$54,045
8	\$60,135
method_b_increment	\$ 6,090

**If dependency\_status = “D” (Dependent),**  
 use dep\_number\_household for Household Size  
 and dep\_total\_income for <total\_income>

**If BOG - Dependency = “I” (Independent)**  
 use ind\_number\_household for Household Size  
 and ind\_total\_income for <total\_income>

**If <total\_income> > Maximum Income for Household Size (from table)**  
 then elig\_method\_b = “No”;  
 else elig\_method\_b = “Yes” .

## Method D Flag and Algorithm

Method D eligibility determination is based on a Yes answer to the “determined homeless” question on the Application Year page. The question was added in 2017 in response to new legislation for homeless youth.

**If <determined\_homeless> = “Yes”**  
**Then elig\_method\_d = “Yes”**  
**Else elig\_method\_d = “No”**

## Computing the Final BOG Eligibility Flag

The algorithm for using the Method A Eligibility, Method B Eligibility, and Method D Eligibility Flags to compute the final BOG Eligibility Flag is as follows:

```

If applicant is found eligible for waiver by both Method A and Method B
set elig_bogfw = "M" (Multiple Methods);
else, if found eligible by Method A only
set elig_bogfw = "A" (Method A only);
else, if found eligible by Method B only
set elig_bogfw = "B" (Method B only)
else, if found eligible by Method D only
set elig_bogfw = "D" (Method D only);
else (Method A Eligibility = "No" and Method B Eligibility = "No" and Method D Eligibility = "No"),
set elig_bogfw = "N" (Not Eligible).

```

### Optional Responses

Whether responses to the questions appearing on the Eligibility Methods Page will be required or optional depends on the Temporary Eligibility A Flag. The algorithm for determining which questions will **not** require a response is shown below.

If any of the special eligibilities questions are Yes and Dependency Flag is D (Dependent),

**Do not** require responses to:

- Receiving TANF/CalWorks \*
- Receiving SSI/SSP \*
- Receiving General Assistance \*
- Parent Receiving Assistance \*
- Persons in Household – Dependent
- Adjusted Gross Income – Dependent
- Other Income – Dependent
- Total Income – Dependent

If any of the special eligibilities questions are Yes and Dependency Flag is I (Independent),

**Do not** require responses to:

- Receiving TANF/CalWorks \*
- Receiving SSI/SSP \*
- Receiving General Assistance \*
- Persons in Household – Independent
- Adjusted Gross Income – Independent
- Other Income – Independent
- Total Income – Independent

\* Responses are not required to these questions if responses on the Special Eligibilities Page set the temporary BOG Eligibility A flag to Yes.
