Overview

CCCApply is part of the California Community Colleges Technology Center's (CCCTC) *Student Success Suite* - a collection of student-facing technology solutions that includes the CCCApply admission applications, the California Colleges Promise Grant (CCPG) application, the CCC MyPath student onboarding portal, and the integrated OpenCCC student account system (OpenCCC).

Document Purpose

This document describes general information, technical specifications, and data elements for the CCCApply Standard Application, as well as the *Noncredit Application* workflow information incorporated within the standard domestic application. The content includes application user interface design and logic, and database table information underlying the application.

Document Audience

This specification and data dictionary is intended for two audiences:

- California Community Colleges staff that works with implementation, configuration, usage, and delivery of data from the CCCApply Standard & Noncredit applications;
- California Community Colleges Tech Center (CCCTC) staff, including software designers, developers, QA technicians, technical writers, and project managers for the CCCApply applications;

General Information

Standard Application

The CCCApply Standard Application is the official online application for admission for the California Community Colleges. The application questions, data, and workflow format align with the laws and regulations of the California Department of Education (Ed Code) and Title V, the Board of Governors of the California Community Colleges, and the guidelines for admission and California residency as prescribed in the Student Accounting & Admissions Manual (SAAM) for the California Community Colleges Chancellors Office.

Who should use the Standard Application?

United States citizens who plan to attend one or more of the California Community Colleges should use the CCCApply Standard Application to apply for admission.

Noncredit Application

For the purposes of supporting students who plan to enroll *exclusively* in noncredit coursework at your college, a separate application workflow path is available within the Standard Application that allows noncredit students to apply for admission without having to answer California residency-related questions. Where applicable, information that applies strictly to the Noncredit Application is provided in the data element tables within this data dictionary.

The Noncredit Application was implemented in 2018 to comply with Assembly Bill 3101 (AB3101). This bill allows students who enroll exclusively for the following reasons to be exempt from community college residency classification requirements:

- Career development;
- College preparation courses; and

- Other courses for which no credit is given.

Who should use the Noncredit Application?

Students who are enrolling exclusively in noncredit courses should use the Noncredit Application workflow. If a student is enrolling in *any* for-credit courses, then they should be directed to use the CCCApply Standard Application. If a student submits a Noncredit Application to a college for a specific term and then ends up enrolling in one or more credit courses for that same term, they may submit a CCCApply Standard Application for the same term. The responses provided on the applicant’s submitted Noncredit application will auto-fill the Standard Application and, once submitted, they will then be processed for a residency status.

Note: Students cannot submit two CCCApply Standard applications for the same term and same college.

Differences Between the Standard and Noncredit Application Workflows

The Noncredit Application has fewer fields and requirements than the CCCApply Standard Application (specifically, no residency questions are asked) and has less field validation. Every CCCApply Standard Application field that is hidden on the Noncredit Application now allows null, and null or blank will appear for these hidden fields in Noncredit Application reporting .

The table below outlines the differences between the CCCApply Standard and Noncredit application workflows.

CCCApply Report Center	Noncredit applications are searchable in the CCCApply Report Center. College staff can look up a full "Noncredit Application" using the standard "Application Lookup."	All CCCApply Standard applications continue to be searchable/reportable in the CCCApply Report Center along with Noncredit applications.
Data Delivery	Note: <i>Noncredit application data fields will show blank or null values for the CCCApply Standard application questions/fields that are hidden on the Noncredit application.</i>	

OpenCCC Account System

OpenCCC is the California Community Colleges federated identity initiative and systemwide student account system that assigns each student user a unique California Community Colleges ID number (CCCID) and allows access to systemwide online technology applications via a single-sign-on account.

OpenCCC Federated Identity & The CCCID

When a new OpenCCC account is created, the system collects and stores the minimum required personal information data as well as the user's validated account credentials in an Identity Center, thus generating a unique identifier for the student known as the CCCID (California Community Colleges ID). The CCCID is the master link between the Identity Center, CCC admission applications, and other systemwide technology services.

When a user is authenticated (signs in) to use a CCC systemwide application or service such as CCCApply or CCC MyPath, the CCCID is passed to that service to identify the unique individual. In this way, services and applications can maintain personal accounts for the user anonymously, thus ensuring the privacy and security of the user's data.

Custom College Configurations

The CCCApply application system is designed to integrate with your college based on your college MIS code and other elements configured by your college and managed by authorized college administrators. These custom components include:

- College Application URL using your college MIS code
- College-branding (logo) displayed as a page header
- Configurable college-specific terms and majors/programs of study
- Configurable college-specific email rules and messages
- Optional display of a *Supplemental Questions* page
- Opt-out display of *Needs & Interests* page

CCCApply Administrator

The functions available in the CCCApply Administrator include:

- Terms configuration management for the Standard, Noncredit or both
- Majors/Programs of Study configuration management for the Standard, Noncredit or both
- Supplemental Questions (optional) management
- Email Rules & Messages configuration management (apply to both applications)
- Reset Downloads
- Utility to manage fraudulent applications (spam) before they reach your college
- Management of authorized college and district Admin users

Note: The Spam Filter Utility information is unique to the CCCApply Standard & Noncredit applications. Secure details can be found in the CCCApply Administrator Guide.

Supplemental Questions

Supplemental questions are additional, configurable questions that colleges can choose to implement (opt-in) for each CCCApply application. Using supplemental questions is optional for each college. *Supplemental Questions* will display on their own page within the designated CCCApply application.

Supplemental questions are configured by the college in HTML format generating supplemental question and response data. Setup of the *Supplemental Questions* page requires configuration of two XML files (a format definition XML and a job XML). These files must be imported and activated in the *Supplemental Questions* module in the CCCApply Administrator.

For details on the different types of data elements and response options supported, see the *Working with Supplemental Questions User Guide* and the CCCApply Administrator User Guide available on the CCCApply Public Documentation website.

Spanish Translation

CCCApply applications are available in both English and Spanish language - including onscreen question text, response options, buttons, links, accessibility features (alt text, etc.), Help information and error messaging.

By clicking the *Cambiar A Espanol* button in the header of any page students can toggle to a full Spanish translation, giving ESL/Spanish-speaking students the ability to complete the entire application for admission completely in Spanish. Additionally, if a student has their web browser (Chrome or Safari) default language set to Spanish, the applications will display in Spanish automatically.

While the application language is set to Spanish, the *Cambiar a Espanol* button text changes to “Switch To English” and can be set back to English language at any time.

Note: *If a browser language is set to anything other than English or Spanish, the application language setting will default to English.*

Accessibility

The CCC Technology Center (CCCTC) is committed to making the CCCApply online applications accessible to individuals of all abilities. CCCTC is developed to be in compliance with California Government Code 11135, which requires such technologies to meet the accessibility requirements of Section 508 of the federal Rehabilitation Act of 1973, as amended (29 U.S.C. Sec. 794d). Our goal is to make all CCCTC systemwide technology applications accessible to everyone, including individuals with disabilities.

Web platforms and services are evolving constantly as is the support for assistive computer technologies. We welcome your feedback for improving the usability and accessibility of web applications and services. Please share your feedback or concerns with accessibility@ccctechcenter.org so we may improve the service for all participants.

For more information, please visit the CCC Accessibility Center at <http://www.cccaccessibility.org>

Application Workflows

All new and returning students applying for admission to one or more California Community Colleges will begin the admission application process by signing in to the OpenCCC Federated ID system before, or immediately after, navigating to CCCApply. An application gateway page is displayed, prompting the user to **Sign In** or create an account.

Application Gateway Page

Each CCCApply application is fronted by an *application gateway* page – or *Sign In* page – which identifies the application title to the applicant, and serves as a single point of entry to your college’s configured and branded application. The URL for your college’s *application gateway* page includes your college ID (MIS code) and captures the activities of the applicant and the processing of the application to that college MIS code.

The *application gateway* page also includes a main menu header containing the California Community Colleges Chancellor’s Office logo and a *Cambiar A Espanol* link which allows the applicant to display and toggle the onscreen text between English and Spanish.

Sign In/Out

Multiple paths can lead students to your custom CCCApply application(s); however, every applicant must sign in to the OpenCCC system (verify their account credentials) before starting, resuming, or submitting a CCCApply application to your college. If the student is a *first-time applicant* to any California Community College they must first create and validate an OpenCCC account (CCCID). If the applicant is a *returning student* but cannot remember their account credentials, a link to *recover* their account credentials is provided on the Sign In page.

Account Creation & Recovery

The *application gateway* page – along with multiple other places throughout the CCCApply application interface – includes links for *Create Account* and *Recover Account* for new and existing applicants. These systems are not unique to each college. Rather, these links pertain to the OpenCCC systemwide student account system that allows for the California Community Colleges system to track and support their students regardless of which college they attend or apply to. New and existing applicants are required to have a current OpenCCC account in order to access the CCCApply system. For more information about the OpenCCC Account system for new and existing users, please visit the CCCApply.org website.

My Applications Page

The *My Applications* page provides returning applicants with a central application storage place for their CCCApply applications, regardless of which CCC college they have applied to or plan to apply to. After signing in to CCCApply, returning students can start a new application, resume an in-progress application, and view previously submitted applications, as well as view and update their OpenCCC Account Profile information.

In-progress and submitted applications are associated to the authenticated applicant using their CCC systemwide student account ID (CCCID). Applications that have been started, but not yet submitted (in-progress applications), can be resumed or deleted.

Actions on the *My Applications* page include:

- Starting a new application
- Resuming & deleting an in-progress application
- Viewing & editing current account information
- Viewing previously submitted application(s)
- Switching the language of the onscreen text between English and Spanish
- Accessing the applicant’s OpenCCC Account from *Settings* menu

- Signing out of the My Applications page or any CCCApply application page

My Applications Page Header

After signing in to CCCApply, applicants see a different version of the main header on the *My Applications* page, including:

- CCC Chancellor's Office logo/*My Applications* page home link
- Applicant's full name and CCCID
- Sign Out link
- Settings menu link
 - o Switch to Spanish toggle
 - o OpenCCC Account
 - o Auto-fill from Previously Submitted Application

Getting to the My Applications Page

Applicants will land on their *My Applications* page **the second time** they sign in to CCCApply from their college's application gateway page or CCC MyPath page. First-time applicants who create their OpenCCC accounts for the first time as part of the CCCApply Standard or Noncredit application workflows will not land on the *My Applications* page by default; however they can reach the My Applications page if they exit an in-progress application or click on the *My Applications* page link in the main navigational header.

Autologin for First-Time Applicants

Following the creation of their OpenCCC Account, *first-time* applicants are automatically logged in and land on the first page of the CCCApply application in which they intended to submit. *Autologin* is a benefit of the "first-time applicant" workflow only and is not part of the "returning applicant" process. First-time applicants **do not begin** the application process from the *My Applications* page when starting their very first CCCApply application.

Starting A New Application (Returning Applicants)

Returning applicants with an existing OpenCCC account may start a new CCCApply application by clicking on the "Start A New Application" button that appears at the top of their *My Applications* page.

NOTE: In order to apply to a specific CCC college, first-time and/or returning applicants must start the application process from their college's *application gateway* page which is typically displayed as an "Apply" button or hyperlink on the college's Admissions & Records web page.

Resuming an In-Progress Application

Applicants that have an existing OpenCCC account and have started but not submitted one or more applications will appear in the **In-Progress Applications** table on the *My Applications* page. The applicant must sign in to CCCApply from a college's application gateway page in order to land on their personal *My Applications* page. All of the applicant's in-progress applications will appear in the **In-Progress Applications** table.

To resume an in-progress application, the applicant must click on the "resume" icon (displayed as a pen in the table row) to display and resume that specific in-progress application.

Deleting an In-Progress Application

To delete an in-progress application, the applicant should click the trash can icon in the *Trash* column of the **In-Progress Applications** table row to remove the unsubmitted application from the system.

The Account Information Section

After signing in, returning applicants will see an **Account Information** section on the *My Applications* page, directly below the “Start A New Application” button or, if displayed, below their “In-Progress Applications” table. The data is populated from the user’s most current account data stored in the OpenCCC system.

The Edit My Account Link

Applicants have the ability to update their Account Information data by clicking on the “*Edit My Account*” button in the *Account Information* section on the *My Applications* page. Once clicked, the *Edit Profile* page of their OpenCCC Account is displayed in a new browser tab.

Viewing A Submitted Application

Authenticated applicants can view their previously submitted applications from the **Submitted Applications** table on the *My Applications* page. Individual submitted applications are displayed in rows with the following details:

- Application ID
- College Name
- Application Type (Standard or Noncredit)
- Submit Date
- *View Application* icon
- *View Links* icon

The applicant must sign in to CCCApply *My Application’s* page and from a college’s application gateway page to land on their personal *My Applications* page.

Signing Out

Applicants can exit the *My Applications* page or end an application session at any time by clicking the “Sign Out” link in the *Settings* menu in the header of every page.

Application Data

CCCApply application data is made available to colleges for automated data delivery via *SuperGlue for Apply*. Real-time data is also available in the CCCApply Report Center. Data download will continue to be supported through June 30, 2023.

Submitted Application Data

Submitted applications are stored in two normalized databases. The database tables used for automated delivery, downloading, and reporting are the `submitted_application` and `submitted_question_response` tables.

When a CCCApply application is submitted, the applicant’s current OpenCCC Account data is copied to the CCCApply application and used for data delivery, download, and reporting.

The `submitted_application` table consists of all of the application data in a single flat row. The `submitted_question_response` table represents a flat version of the answers to the supplemental questions (if available). The content of both of these tables is used for automated data delivery via SuperGlue, and downloading and reporting.

In-Progress Application Data

Applications that have been started or resumed, but not yet submitted, are referred to as *in-progress applications*. In-Progress applications, including the applicant’s current OpenCCC Account data, is stored in a normalized database. The tables in this document represent the data as it is stored in this database. When an in-progress application is submitted, the data is copied to the <submitted applications> database and used for SuperGlue data delivery, downloads, and reporting.

Restricted Data

For security reasons, some fields are restricted from download or reporting, such as the AB620 data fields (sexual orientation, transgender identification, etc.) and other sensitive system fields. In some cases fields are encrypted and only available, anonymously and with no connection to any other application data, for reporting at the California Community College Chancellor’s Office (CCCO). These storage and usage notes are specified in the data element tables, as well as the *Table of Application Data Fields* at the end of this specification which provides a matrix showing which data is or is not available by SuperGlue, download, email rules, and reporting.

OpenCCC Account Data

The applicant’s current OpenCCC account information, gathered during the account creation process, or updated/edited at any time following account creation, is stored and passed to the college as part of the full submitted application. Most of the fields captured during the account creation process are stored in the user’s account Profile and may be used for Account Recovery, while a few other system-generated fields may be stored in the database but not passed to the college via the integrated application.

Table A: OpenCCC Account Data

For each question and associated field in the OpenCCC account creation process, *Table A* indicates the type and format of the entry field, whether a response is required for that entry field, and any other significant information related to the field.

Data Field	Data Element	Required	Format	Usage / Description
------------	--------------	----------	--------	---------------------

Create & Verify Account Data Fields				
Email Address	<email>	Required	Textbox	Can be used for verification of identity during account creation, and/or as a preferred method of contact after credentials are validated.
Phone Number	<mainphone>	Optional	Textbox	Can be used for verification of identity during account creation, and/or as a preferred method of contact after credentials are validated.
Phone Type	<phoneType>	Optional	Menu	Set to “mobile” by default if mobile number is verified; otherwise a “landline” can be entered.
Verification Code	<verificationCode>	Required	Textbox	User is required to verify an email address or mobile phone number during account creation by entering a valid security code on the Verification Code page, in order to create an account.
Preferred Method of Contact	<preferredMethodOfContact>	Required	Button	Set initially during the verification process, but can be changed between mobile and email address at any time. One verified method must be identified in the Account Profile.
Accepted Terms of Use	<acceptedTerms>	Required	Checkbox	User is required to acknowledge the Terms of Use and consent to statement granting permission to college and other entities
Personal Information Fields				
Legal First Name	<firstname>	Optional	Textbox	First name of the user.
Legal Middle Name	<middlename>	Optional	Textbox	Middle name of the user.
Legal Last Legal	<lastname>	Required	Textbox	Lasts name of the user which may appear on government or educational documents.
Legal Name: Suffix	<suffix>	Optional	Menu	Suffix of the user.
Preferred Name	<preferred_firstname>	Optional	Textbox	One manual input textbox allowing the user to identify a preferred name.
Contact Information Fields				
Permanent Address: Homeless	< no_perm_address_homeless>	Required	Yes / No	Checkbox question to allow the user to indicate that they are currently homeless and do not have a

	<addressHomeless>			permanent address. This removes the requirement to provide a permanent address during account creation.

Account Credentials

Password	RESTRICTED	Required	Textbox	Password credential created by the user that meets all security requirements.
Username (Legacy Only)	RESTRICTED	System	Textbox	Username credential created by a legacy user at the time of account creation.

System Fields & Timestamps

CCCID	<ccc_id>	System		System-generated ID code for the confirmed user account.
Accepted Terms of Use Timestamp	<acceptedTermsTimestamp>	System	Date timestamp	Date and time that the user accepted (checked) the Terms of Use field.
Address Validation Override	<addressValidationOverride>	System		USPS address validation service scrubs user address input and verifies against standards. If needed provides an option the user USPS address validation invoked address
Address Validation Override Timestamp	<addressValidationOverrideTimestamp>	System	Date timestamp	Date and time that the user accepted the USPS address validation suggestion.

Email Verified	<emailVerified>	System		Flag indicating that the user verified their email address for the purposes of authenticating their identity during account creation.
Email Verified Timestamp	<emailVerifiedTimestamp>	System	Date timestamp	Date and time that the user verified their email address.
Phone Number Verified	<mainPhoneVerified>	System		Flag indicating that the user verified their mobile phone number for the purpose of authenticating their identity during account creation.
Phone Number Verified Timestamp	<mainPhoneVerifiedTimestamp>	System	Date timestamp	Date and time that the user verified their mobile phone number.
Created Timestamp	<create_tmstamp>	System	Date timestamp	Date and time that the user created their OpenCCC user account.
Updated Timestamp	<update_tmstamp>	System	Date timestamp	Date and time that the user updated their Profile information in their OpenCCC user account.

Field Population

There are two ways that data fields auto-populate (auto-fill) to the CCCApply Standard and/or Noncredit applications. These are:

- **Auto-fill Account Profile Information:** OpenCCC Account data that auto-populates every CCCApply Standard and/or Noncredit application submitted by the applicant
- **Auto-fill Previous Submitted Application Data:** Conditional field population of a second or a subsequent submitted application (the applicant opts-in to copy previously submitted application data into a new application)

Auto-Fill of Account Profile Information

At the time of application submission, the following *OpenCCC Account* data fields will always auto-fill to the CCCApply application and will be included in the complete submitted application:

CCCID
 First Name
 Middle Name
 Last Name
 Email Address
 Birthdate
 Phone Number (Mainphone)
 Address: Homeless
 Permanent Address: Country
 Permanent Address: Street Address 1 and 2

Permanent Address: City

Permanent Address: State/Province

Permanent Address: Postalcode/Zip Code

Note: Current Mailing Address fields can be populated from the applicant’s current Permanent Address data fields from their OpenCCC Account by selecting the check box in the application that indicates the addresses are the same.

Auto-Fill of Previous Submitted Application Data

When an applicant has previously completed and submitted one or more CCCApply Standard and/or Noncredit applications, he/she can have their previous responses auto-filled into the new application of the same type **if the application is submitted within two years of the current date.**

Previously submitted application data *cannot* be used for auto-population in the following cases:

- the last most recent application is over two years old from the current date
- the last and only application was left in-progress and was never submitted

By default, the system will auto-fill select application data from the most recent submitted application. However, the user can opt-out of field autofill at any time by selecting “Autofill” from the header menu in their **My Applications** page.

Auto-population of previously submitted application data provides the following functionality:

- The applicant can choose to change/edit any of the auto-filled fields even if they selected **Yes** for auto-fill.
- Auto-filled fields in the new application will display the most recent previous application responses, and will appear in blue highlighting.
- The following types of fields will not auto-fill at any time, even if the applicant elects auto-population:
 - o Residency determination-related fields
 - o Supplemental questions fields
 - o AB620 data (Gender section)
- When the applicant either tabs past the auto-filled field or edits or clicks the **Save** or **Continue** button within an application, the auto-filled values are treated as "verified" by the system and the blue highlighting no longer displays.

Note: If the applicant tabs past a field, then navigates to a different page in the application without clicking **Save** first, when they return to that page the blue highlighting will display again for the auto filled field that was tabbed past. When you save the application and resume it later, auto-filled questions not verified initially will continue to display in blue highlighting.

Auto-Fill by Application Section

The following list of fields by tab (or page) indicate which fields do or do not auto-fill when the applicant opts-in (chooses **Yes**) to field auto population (auto-fill).

Tab/ Page / Section	Fields that do/don't auto-fill in Standard App	Fields that do/don't auto-fill in Noncredit App
Enrollment	No fields on this page auto-fill values	No fields on this page auto-fill values
Profile	<p>Previous/Other Name fields <i>do not</i> auto-fill from legacy OpenCCC account system.</p> <p>If the applicant’s SSN/TIN response (ssn = Yes) is already stored in the CCCApply submitted application database (from a previously submitted application) the SSN/TIN <ssn> field(s) WILL auto-fill in the Social Security Number question in the Standard Application only. Review, Consent, Submission	No fields on this page auto-fill values	No fields on this page auto-fill values

The Account data fields listed below are **no longer** collected in the OpenCCC Account system for new accounts and will no longer auto-fill in the new Account Information section on the **My Applications** page or for previously submitted applications. These fields are now collected within the CCCApply Standard & Noncredit Application during completion of the application.

- Previous/Other First Name
- Previous/Other Middle Name
- Previous/Other Last Name
- SSN
- SSN Type
- No SSN
- SSN Exception

USPS Address verification: All US addresses in the CCCApply application are validated using the USPS address validation system. This includes the addresses collected in the OpenCCC Account Creation or Edit Account processes.

Data Delivery & Reporting

Your application data is made available to your college via automated data delivery (*SuperGlue for Apply*). Real-time application data is also available in the CCCApply Report Center and to authorized college staff in the Data Warehouse Report Server. Data downloads via the CCCApply Download Client will continue to be supported with mandated COMIS data through June 30, 2023.

Changes to Data Elements

The data elements in this Data Dictionary are subject to change with the implementation of release hot-fixes and version updates. Fields, values, questions and responses may be added, modified, or deprecated across the application user interface and storage at any time. Changes will be documented in the version *Change Log* as needed.

Data Element Tables

In addition to system-generated data fields and functionality, the majority of data elements are defined in the order in which they appear to the applicant, with back-end and hidden data elements presented where logically appropriate.

Data Formats

The tables in this document represent the data values stored in the formats described in this data specification and should correspond to the existing formats in the CCCApply system where possible. Where data correlates to CCCCO MIS data elements, reported by colleges to the Chancellor's Office in a pre-defined format, the deliverable data must be in the MIS format.

Format of Data Element Tables

Information about each data element is presented in a table with the following layout and contents:

Data Element Name:	The CCCApply database table and data element, in format 'table: element'.
Description:	A description of what the data element represents.
Type/Format, Length:	The format (data type) and length of the data element.
Values/Response Options:	Possible values that the data element can have. When presented in the format 'X = Description', X is the stored (and delivered) value, and the description is the meaning of the value. For menus, reports, and displays, the description (perhaps edited) is used.
Storage/Usage:	Specifies data storage, usage, constraints and other security considerations.
Allows Null:	Whether the data element can be null in a submitted application.
Default:	The data element's default value, if any; most CCCApply values do not have a default. Usage: Information about how the data element is used.
Conditions	Indicates whether a condition must be met in order for page or field display, or validation check.
Onscreen Label/Prompt Text	Describes the text and language that displays to the applicant on the application interface.
Additional Onscreen Text:	Describes any supporting text or language that may display to the applicant on the interface.
Notes:	Additional information, comments, and/or question about the data element.
Revision Log:	Information about changes made to this table.

System Database Tables

System database tables include system-generated values that are not populated based on any field entry in the applications but are configured to auto populate the database for each application for your college.

System Variables	System variables are fields generated by the system.
------------------	--

Supplemental Questions Table	The Supplemental Questions page allows colleges to add its own custom questions to their application. A college may choose whether or not to employ a Supplemental Questions page.
Survey Table	<p>The Survey table contains the responses to the three optional form fields in the Student Satisfaction Survey, which is presented to the student after submitting a CCCApply Standard or Noncredit application. The survey is optional and appears on the same page as the Special Links & Opportunities section at the end of the application process.</p> <p>Colleges can run a report on the Student Satisfaction Survey results from their applicants in the CCCApply Report Center.</p>

System Data Fields

The data elements in this section represent system values that are not populated based on any field entry in the CCCApply Standard and/or Noncredit applications but are configured to auto populate the database for each application for your college.

Application ID

Data Element:	app_id
Description:	The unique identifier for a single application to college.
Type/Format, Length:	bigint
Values:	Unique number assigned by the system for every application.
Storage/Usage:	Used to uniquely identify a single application.
Allows Null:	No
Default:	None
Notes:	

California Community College ID

Data Element:	ccc_id
Description:	<p>The user's unique CCCID for Federated Identity.</p> <p>The unique identifier for a single user's account. This identifier is assigned during account creation in OpenCCC. This field is passed as part of a submitted application to each college and is stored in the college Student Information System (SIS). This field can be used for student authentication when a student signs in at a college. It can be passed as an attribute to student statewide services so the service can verify the student has an OpenCCC account and perform automatic sign in. This field will also be passed as an MIS field.</p>

Type/Format, Length:	VarChar 8
Values/Response Options:	<p>The format of the ccc_id is:</p> <p>Positions 1 - 3: AAA thru ZZZ (Sequentially assigned beginning with AAA)</p> <p>Positions 4 – 7: 0001 thru 9999 (Sequentially assigned beginning with 0001 for each value in positions 1-3)</p> <p>Position 8: For future expansion if all values become exhausted.</p> <p>Note: In positions 1-3, “I” and “O” are not used to avoid confusion with “0” and “1”.</p>
Allows Null:	No. This is a system assigned field and is not entered by the user.
Default:	System assigned.
Storage/Usage:	Populates the CCCApply applications from the applicant's OpenCCC Account at the time of submission.
Notes/Constraints:	<p>System-generated unique identifier.</p> <p>System will support expansion of CCCID to 8 characters (XXXXNNNN).</p>
Revision Log	OpenCCC 2.0

Accepted Terms Timestamp

Data Element:	acceptedTermsTimestamp
Description:	Date and time of user’s acceptance of the Terms of Use.
Type/Format, Length:	date timestamp with time zone
Values /Response Options:	
Allows Null:	
Default:	
Storage/Usage:	Stored with <acceptedTerms> at time of account creation.

Error Validation Checking:	
Notes/Constraints:	Note: Data not available for delivery or reporting in v.6.9.0.
Revision Log:	OpenCCC 2.0

Address Validation Override Timestamp

Data Element	addressValidationOverrideTimestamp
Description	Date and time that the user chose to override a suggested address that meets USPS format, or s of the address validation override.
Type/Format, Length	date and time with time zone
Values/Response Options	
Storage/Usage	
Notes/Constraints	Note: Data not available for delivery or reporting in v.6.9.0.
Revision Log	OpenCCC 2.0

Campaign Fields

Data Element:	campaign1, campaign2, campaign3
Description:	The campaign name that the college designated in the URL link to the CCCApply Standard application to indicate the source of the student's application. Up to three campaigns may be stored in the database.
Type/Format, Length:	varchar, 255
Values:	Text string; supported characters: a-z, A-Z, 0-9, -, _ ., ~ and %
Storage/Usage:	Provides a name that colleges can download and report on as a measure of a campaign's success.
Allows Null:	No
Default:	None
Notes:	Submitted Application table.

	<p>In order to implement the campaign feature, when you create your URL for students to link to the CCCApply application you must add the extra parameter of &user1=x (where x = the name of your campaign) on to the end of the URL link. You can do this for up to three parameters, using &user1=x&user2=y and &user3=z (where x, y and z = the names of other unique campaigns). For example, the format for implementing a URL for three campaigns would look like this:</p> <p>http://www.google.com</p> <p>https://www.opencccapply.net/cccaply-welcome? cccMisCode=231&user1=x&user2=y&user3=z</p> <p>An example of the practical implementation of this format is:</p> <p>https://www.opencccapply.net/cccaply-welcome?cccMisCode=231&user1=collegeIntroPage&user2=advertOnGoogle&user3=advertOnGoodMorningAmerica</p>
Notes:	

College ID

Data Element:	college_id
Description:	The system's identifier for a particular California Community College.
Type/Format, Length:	bpchar, 3
Values:	3-digit code
Storage/Usage:	Identifies a particular college based on the system's table of college ID codes. System field: Required and non-configurable.
Allows Null:	No
Default:	None
Notes:	College table.

College Name

Data Element:	college_name
Description:	Name of college student is applying to.
Type/Format, Length:	varchar, 50
Values:	Text string
Storage/Usage:	Displayed in many places in the online application process.
Allows Null:	No

Default:	None
Notes:	College table. Required and customizable.

College Address: Street

Data Element:	streetaddress1, streetaddress2
Description:	Street address for the college, in two lines.
Type/Format, Length:	Each: varchar, 50
Values:	Text strings
Storage/Usage:	Displayed on Application Confirmation page. This field can be customized in the Administrator to appear in the CCCApply application. Values are configured on the College tab in the Administrator and stored in the College table. Required.
Allows Null:	streetaddress1 – No - streetaddress2 - Yes
Default:	None
Notes:	Stored in the College table.

College Address: City

Data Element:	city
Description:	City portion of college's address
Type/Format, Length:	varchar, 50
Values:	Text string
Storage/Usage:	Displayed on Application Confirmation page. Required and customizable.
Allows Null:	No
Default:	None
Notes:	State is always 'CA' when address is displayed. College table.

College Address: Zip Code

Data Element:	postalcode
---------------	------------

Description:	ZIP Code portion of college's address
Type/Format, Length:	varchar, 10
Values:	Text string, 5 or 10 characters
Storage/Usage:	Displayed on Application Confirmation page. Required and customizable.
Allows Null:	No
Default:	None
Notes:	Stored in the College table.

College Website URL

Data Element:	url
Description:	URL for college's website
Type/Format, Length:	varchar, 50
Values:	Text string
Storage/Usage:	Required. Multiple uses, including display on the Application Confirmation page and other pre-and post-submitted application emails; used in hyperlinks to college website
Allows Null:	No
Default:	None
Notes/Constraints	This field can be customized in the CCCApply Administrator to appear in the CCCApply application. Values are configured by the College in the Administrator and stored in the College table.

College Phone Number

Data Element:	phone_adm
Description:	Phone number for college's Admission Office
Type/Format, Length:	varchar, 14
Values:	Text string
Storage/Usage:	Displayed on the Application Confirmation page. This field can be customized in the CCCApply Administrator to appear in the CCCApply applications.

	Values are configured by the College in the CCCApply Administrator and stored in the College table. Not required.
Allows Null:	No
Default:	None
Notes:	Stored in the College table.

College Email

Data Element:	email_adm
Description:	Email address for college's Admission office
Type/Format, Length:	varchar, 50
Values:	Text string
Storage/Usage:	Displayed on Application Confirmation page
Allows Null:	No
Default:	None
Notes:	College table. This field can be customized in the Administrator to appear in the CCCApply application. Values are configured on the College tab in the Administrator and stored in the College table. Not required.

College District

Data Element:	district_id
Description:	An id code linking the college to a District table
Type/Format, Length:	bpchar, 3
Values:	3-digit code
Storage/Usage:	Links college to information about the district it is in.
Allows Null:	Yes
Default:	None
Notes:	Current schema shows 'null' not allowed. College table.

College Redirect URL

Data Element:	redirect_url
Description:	The URL the college wants the student's browser to open a new tab for and navigate to upon application submission (Sign Out & Finish button). Note: This field is not fully supported and is only available upon special request/permission basis by contacting CCCApply Product Manager (pdonohue@ccctechcenter.org)
Type/Format, Length:	Varchar
Values:	Valid web site URL.
Storage/Usage:	Sends student's web browser focus to a college-specific URL upon application submission to encourage a more seamless experience.
Allows Null:	Yes
Default:	Null
Notes:	College table.

College District ID

Data Element:	district_id
Description:	The system's identifier for a particular CCC District.
Type/Format, Length:	bpchar, 3
Values:	3-digit code
Storage/Usage:	Identifies a particular CCC District based on the system's table of district ID codes. System field: required and non-configurable.
Allows Null:	No
Default:	None
Notes:	District table.

Confirmation Number

Data Element:	confirmation
Description:	The confirmation number assigned by the system for a single application at the time of application submission.

Type/Format, Length:	Varchar, 30
Values:	Unique number assigned by the system for every application.
Storage/Usage:	Used to uniquely identify a single application. For colleges and applicants, this is the number that identifies a particular submitted application. It is displayed on Application Confirmation page and elsewhere
Allows Null:	No
Default:	None
Notes:	The value of the confirmation number for a Noncredit Application will be a concatenation of “NC-“ + app_id. Example: NC-10765. Application confirmation displays on the 'My Applications' page after an application is submitted.

Created Time

Data Element:	createdTime
Description:	Date and time of account creation
Type/Format, Length:	timestamp with time zone
Allows Null:	
Default:	
Storage/Usage:	
Notes/Constraints:	Note: Data not available for delivery or reporting in v.6.9.0.
Revision Log	OpenCCC 2.0

District Name

Data Element:	district_name
Description:	Name of district
Type/Format, Length:	varchar, 50

Values:	Text string
Storage/Usage:	Used to identify the college district by the Help Desk for student support and account recovery. Required and customizable.
Allows Null:	No
Default:	None
Notes:	District table.

District Address: Street

Data Element:	streetaddress1, streetaddress2
Description:	Street address for the district, in two lines.
Type/Format, Length:	Each: varchar, 50
Values:	Text strings
Storage/Usage:	This field can be customized in the Administrator to appear in the CCCApply application. Values are configured on the District tab in the Administrator and stored in the District table. Required and customizable.
Allows Null:	streetaddress1 – No, streetaddress2 - Yes
Default:	None
Notes:	District table.

District Address: City

Data Element:	city
Description:	City portion of district's address
Type/Format, Length:	varchar, 50
Values:	Text string
Storage/Usage:	Currently no use is defined. Required and customizable.
Allows Null:	No
Default:	None
Notes:	State is always 'CA'. District table.

District Address: Zip Code

Data Element:	postalcode
Description:	ZIP Code portion of district's address
Type/Format, Length:	varchar, 10
Values:	Text string, 5 or 10 characters
Storage/Usage:	Required and customizable.
Allows Null:	No
Default:	None

Account Data Fields in CCCApply Applications

The tables in this section specify the fields that are populated with OpenCCC Account Information.

Email Address

Data Element	email
Description	User's email address.
Type/Format, Length	char, 254 Two fields; each up to 254 characters, alphanumeric plus '@' and '.'

Notes:	<p>This question determines whether the applicant will be under 19 on RDD is subject to care and control of guardian for purposes of determining residency. For residency purposes (unlike in general law), a minor is defined as someone under 19 years of age.</p> <p>General law identifies a ‘minor’ as a person under age 18; however, the “Evidence of Intent” rules in the Student Attendance Accounting Manual (Chapter 2), based on Title 5 section 54024, specifies ‘under 19 years’ as the differentiating criterion, superseding general law.</p>

High School Transcript Information

General Requirements

The technical specifications below are for the *High School Transcript Information* section, which appears on the Education page for credit applications only. The *High School Transcript Information* section does not display in the Noncredit Application.

Onscreen Text: "College staff use this information to provide guidance. Your responses will not affect your admission to college."

Display Conditions

The High School Transcript Information section appears between the *Last School Attended* and the *College Education Level* sections IF *either of the conditions* shown below are met, otherwise it does not display.

Condition 1:

Display the "High School Transcript Information" section *with the* Highest Grade Completed question *IF:*

High School Education Level is one of the following:

- "Will be enrolled in high school (or lower grade) and college at the same time" OR
- "Will be enrolled in adult school and authorized to enroll in college at the same time" OR
- "Not a graduate of, and no longer enrolled in high school"

AND

High school Country = United States

Condition 2:

Display "High School Transcript Information" section *and display* "Grade Point Average" question, but DO NOT display "What was the highest grade you completed in high school?" question *IF*:

High School Education Level is one of the following:

- Received high school diploma from US high school
- Passed a high school equivalency test
- Received a Certificate of California High School Proficiency;
AND
- High School Country = United States

THEN, display "High School Transcript Information" section with *Highest Grade Completed*, *Grade Point Average*, highest English course, and highest math questions.

Else do not display the High School Transcript Information section or any section questions.

High School Transcript: Math course definition

You may want to refer to your High School transcript to answer this question

Pre-algebra, Fundamentals of Math, Algebra Preparation, Algebra Skills, Algebra or Math Essentials, Math 9

Topics include: exponents and radicals (e.g. square roots), the coordinate system, sets, logic formulas, and solving linear, first-degree equations and inequalities. These classes often cover the use of equations to solve word problems is taught along with solving equations in one and two variables.

Algebra 1, Algebra, Algebra 1B, First Year Algebra

Topics includes: addition, subtraction, multiplication and division of real numbers; inequalities and absolute value in equations; slope and x and y intercepts, graphing of linear equations; inequalities and quadratic equations; systems of two linear equations; polynomials; rational expressions and functions; the quadratic formula;

Integrated Math 1

Topics include: functions; algebra; geometry; statistics; probability; discrete mathematics; measurement; number; logic; and language.

Integrated Math 2

Topics include: quadratic expressions, equations, and functions; comparing their characteristics and behavior to those of linear and exponential relationships.

Geometry, Plane and Solid Geometry, Formal Geometry, Academic Geometry, etc. (usually occurs after Algebra 1)

Topics includes: graphing lines, areas and volumes of plane figures and solids; congruence and similarity; the Pythagorean theorem; properties of angles, parallel and perpendicular lines, triangles, special right triangles, quadrilaterals, and circles; and basic trigonometric function.

Algebra 2, Algebra II, Intermediate Algebra, Advanced Algebra, Algebra 2/Trigonometry (usually occurs after Geometry)

Topics includes: polynomials of higher order, logarithms and logarithmic functions, absolute value, systems of linear equations and inequalities, matrices, operations on polynomials, rational expressions, quadratic equations and functions, conic sections, inverse functions, sequences and series, the basic ideas of probability and statistics.

Integrated Math 3

Topics include: applying methods from probability and statistics to draw inferences and conclusions from data; expanding understanding of functions to include polynomial, rational, and radical functions; trigonometry of general triangles and trigonometric functions.

Statistics, Probability and Statistics, AP Statistics (students having completed AP Statistics should consult with college assessment and admissions websites and/or personnel)

Topics includes: independent events, conditional probability, discrete random variables; examinations of chance-based phenomena; standard distributions; mean, median, and mode; variance and standard deviation; probability theory; and data organization.

Integrated Math 4

Topics include: advanced geometry, advanced algebra, and probability and statistics.

Trigonometry

Trigonometry course topics include: radian measure; unit circle; trigonometric identities; simplifying

	<p>trigonometric expressions; graphs of trigonometric functions and their inverse; polar coordinates; analytic geometry; and graphing circular functions.</p> <p>Math Analysis Topics include polar coordinates, vectors, complex numbers, limits, mathematical induction, fundamental theorem of algebra, conic sections, rational functions, and functions and equations defined parametrically.</p> <p>Pre-calculus, or Trigonometry and Math Analysis (must include both) Topics includes: coordinate geometry with analytical methods and proofs; equations and graphs of conic sections; rectangular and polar coordinates; parametric equations; vectors; the study of polynomial, logarithmic, exponential, and rational functions and their graphs; induction; limits and rate change; continuity; and problem analysis.</p> <p>Calculus, AP Calculus, IB Math SL, IB Math HL, or other courses beyond Calculus such as Linear Algebra (students having completed AP or IB courses should consult with college assessment and admissions websites and/or personnel) Topics includes: the study of derivatives and differentiation; limits; instantaneous rates of change; areas under graphs of functions of first and second derivatives; integration; the definite and indefinite integral; and applications of calculus.</p>

Colleges Attended Information

The number of College/University question sets that will appear depends on the response to Number of Colleges Attended.

To minimize redundancy, this document provides tables for the College/University 1 question set only. For College/University 2, College/University 3, and College/University 4, everything is the same as for College/University 1 **except**:

Wherever it occurs in the tables, “College/University 1” will be replaced by “College/University 2”, “College/University 3”, or “College/University 4” as appropriate.

The question set for College/University 2 will appear when Number of Colleges Attended is ‘2’, ‘3’, ‘4’, or ‘5 or more’.

The question set for College/University 3 will appear when Number of Colleges Attended is ‘3’, ‘4’, or ‘5 or more’.

The question set for College/University 4 will appear when Number of Colleges Attended is ‘4’ or ‘5 or more’.

Sorting Colleges Attended

When there are two or more colleges, they can be listed in any order by the applicant. However, in the database they will be sorted and saved in order of attendance, with College/University 1 the most recently attended. The primary sorting date will be Attendance Ended; the secondary sorting date will be Attendance Began. If two or more colleges have the same Attendance Ended date and the same Attendance Began date, it doesn’t matter which comes before the other in the sorting.

Needs & Interests

The tables in this section show the data element information for the fields that are populated on the Needs & Interests tab of the CCCApply Standard & Noncredit Applications.

Once an applicant submits their application, their responses to the needs and interests questions are mapped and stored in the submitted_application table (i.e. a response to “Comfortable with English” is stored in the comfortable_english column) and are available for download.

Summary Table of Needs & Interests Values

The values below represent a summary of the values stored in the system ni_id table as displayed below. Once an applicant's application is submitted, responses to these questions are stored and available for download from the single submitted_application table. For details on the values you can download, see the tables that follow the table below.

Onscreen Label/Prompt Text:	Are you interested in participating in a sport while attending college? [radio button] Yes, I am interested in one or more sports, including the possibility of playing on an <u>intercollegiate team</u> .
Additional Text:	(Your response does not obligate you in any way. To be eligible to participate on an intercollegiate team, you must be enrolled in at least 12 units.)
Help:	Levels of College Sports California Community Colleges generally offer the opportunity to participate in sports at various levels, though not all colleges offer sports at all levels. At the highest level, intercollegiate teams (also called ‘varsity teams’) represent the college in competition against other colleges, typically in conferences under the authority of the California Community Colleges Athletic Association (CCCAA). For more about this level of college sports, see the website for the CCCAA (www.cccaasports.org {hyperlink opens in another tab/window}) and the college’s website. {Replace ‘the college’s website’ with ‘the <CollegeName> website (<URL/hyperlink>’ if feasible). Intramural and club sports allow students to participate at a less rigorous level than the intercollegiate teams and/or to play a sport for which the college does not field an intercollegiate team. In intramural sports, several teams from the college play each other in college-sponsored competitions. In club sports, the clubs are sanctioned by the college but make or find their own opportunities for competition.
Notes:	This question is intended to be used as a key for determining which applicants will receive a Title IX survey from the college.

Demographic Information

The tables in this section show the fields that are populated from the Demographic Information tab of the CCCApply Standard application.

Gender

Data Element:	gender
Description:	Applicant's response to gender question in the Gender/Transgender section.
Type/Format, Length:	bpchar, 1
Values/Response Options:	F = Female M = Male B = Non-binary X = Decline to state <Null> = No selection
Allows Null:	Yes
Default:	-- Select Gender --
Storage/Usage:	Correlates to MIS element SB04, with some difference in values. Gender is used primarily by agencies affiliated with state reporting and evaluation of educational programs.
Field Error Check:	None
Page Error Check:	None
Conditions:	Always display the Gender data field (to minors and non-minors)
Onscreen Label/Prompt Text:	Gender [menu] (< when user is 17 yro and younger) Gender/Transgender [menu] (< when user is 18 yro and older)
Additional Text:	"This information will be used for state and federal reporting purposes. It is optional and voluntary and will not be used for a discriminatory purpose. "Gender in this context, means a person's sex, or a person's <u>gender identity</u> and <u>gender expression</u> ."
Help Icon	Please indicate your gender.

Pop-Up Help:	<p>The Pop-Up Help text box contains definitions for the Gender, Transgender, and Sexual Orientation questions/data fields. The Pop-Up Help box appears when the user clicks on any of the hyperlinks that appear onscreen for the user.</p> <p>The same help text (shown below) displays for all onscreen hyperlinks:</p> <p>"Sexual Orientation" Sexual orientation describes an enduring pattern of attraction-emotional, romantic, sexual, or some combination of these-to persons of the opposite sex, the same sex, or to both sexes, as well as the genders that accompany them.</p> <p>"Gender Identity" means one's private sense of being male or female.</p> <p>"Gender Expression" means a person's gender-related appearance and behavior, whether or not stereotypically associated with the person's assigned sex at birth.</p> <p>"Transgender" is the state of one's gender identity (self-identification as woman, man, neither or both) not matching one's assigned sex (identification by others as male, female or intersex based on physical/genetic sex).</p>
Notes:	<p>Correlates to MIS SB04, with modified descriptions.</p> <p>Gender is sensitive information, protected by federal law and the Office of Civil Rights. Any change to the text, prompt, access, or transmission of this data item must be approved by the Legal Counsel of the CCC Chancellor's Office and the Office of Civil Rights.</p> <p>This information may not be provided to staff in the capacity of making a decision to admit an applicant until after the applicant is admitted—that is, uniformly enabled to register for classes.</p> <p>"Decline to state" must be one of the choices for gender, per OCR. Not only does this choice provide the required option not to identify gender, there are also people who do not identify with any gender option.</p>

Transgender

Data Element:	<p>transgender</p> <p>Note: RESTRICTED FIELD. Not downloadable via CCCApply Download Client.</p>
Description:	Applicant's response to transgender question in the Gender/Transgender section.
Type/Format, Length:	bytes, 1
Values/Response Options:	<p>1 = Yes</p> <p>2 = No</p> <p>3 = Decline to State</p> <p>0 = No selection</p> <p>Null = not displayed to user</p>

Allows Null:	Yes Null value is stored for applicants <i>under 18</i> years of age.
Default:	-- Select Transgender Response --
Storage/Usage:	These requirements are for the implementation of AB620. California law (AB620) requires the California Community Colleges to collect aggregate demographic information regarding the sexual orientation, gender identity, and gender expression of students. It also requests annual transmittal of summary demographic reporting to the Legislature and posting of such summary information on the CCC Chancellor's Office web site.
Field Error Check:	None
Page Error Check:	None
Conditions:	Displays ONLY if the applicant is 18 years old or older; Does NOT display if applicant is 17 years old or younger.
Onscreen Label/Prompt Text:	Do you consider yourself transgender? [menu]
Additional Text:	<i>"By California law, the California Community Colleges collect voluntary demographic information regarding the sexual orientation, gender identity, and gender expression of students. This information is used for summary demographic reporting and will not be used for a discriminatory purpose. Your responses are kept private and secure. Providing this information is optional."</i>
Pop-Up Help:	A single Pop-Up Help text box is used to display definitions/help for the Gender/Transgender section: "Sexual Orientation" Sexual orientation describes an enduring pattern of attraction-emotional, romantic, sexual, or some combination of these-to persons of the opposite sex, the same sex, or to both sexes, as well as the genders that accompany them. "Gender Identity" means one's private sense of being male or female. "Gender Expression" means a person's gender-related appearance and behavior, whether or not stereotypically associated with the person's assigned sex at birth. "Transgender" is the state of one's gender identity (self-identification as woman, man, neither or both) not matching one's assigned sex (identification by others as male, female or intersex based on physical/genetic sex).
Notes:	Restricted data; not available for download. AB620 questions do not appear to applicants under 18 years of age (minor). As per the AB620 requirements, only display the question text/label for "Transgender" if the student is 18 years old or older (non-minor). The "/Transgender" part of the Gender section label is conditional and only appears if the student is under 18 yrs. If the student is 18 years old or older, the "/Transgender" part of the section label should appear. 9.28.18: The "Additional Text" was changed to more accurately reflect how the demographic data is summarized and transmitted to the CCCCO.

Consent & Submission Information

The tables below show the fields that are populated from the Submission tab and other data that may be populated at submission of a CCCApply standard and noncredit applications.

Consent

Data Element:	consent_indicator
Description:	Applicant's response to Consent to Release Information question.
Type/Format, Length:	boolean, 1
Values/Response Options:	As shown in Question Text. 1 = True/Yes 0 = False/No
Allows Null:	No
Default:	False
Storage/Usage:	Per CCCCO legal, colleges should use this data element to determine how they will share information; and should forward it to MIS.

Conditions:	Always
Onscreen Label/Prompt Text:	The community colleges you attend and the Chancellor's Office of the California Community Colleges request your help. We ask that you agree to allow us to release necessary personal information about you to various agencies and organizations so we can do research, plan programs and offer special services to you (such as transfer opportunity information or state financial aid). If you do agree to give your consent, your information will not be sold, used for commercial purposes, released to the public, or given to other government agencies for purposes of determining benefits (other than financial aid), except where specifically required by law. In addition, if you do consent to release of your information, those organizations and agencies to which your information is given are prohibited by law from using it for any unauthorized purpose or releasing it to anyone else. If you do not give your consent, personal information about you will not be shared with other organizations or agencies except where allowed by law. You should also know that, answering "no" to this question will not prevent release of certain "directory information" about you. To learn more about directory information or how to block its release, see the Privacy Policy.

Download Status

Data Element:	status
Description:	The download status of an application using the CCCApply Download Client.
Type/Format, Length:	Character (1)
Values:	I = Initial (when application is initially inserted into the submitted_application table), D = Downloaded (application has been downloaded to the college)
Storage/Usage:	This field is relevant only to the submitted_application table (and the CCCApply Download Client and download server).
Allows Null:	No
Default:	None

Fraud Score

Data Element:	fraud_score
Description:	Identifies the probability that the application is fraudulent based on the prediction service as part of the Spam Filter web service.
Type/Format, Length:	double precision
Values:	
Allows Null:	
Default:	
Storage/Usage:	Restricted; not for download.
Notes:	Not downloadable.

Fraud Status

Data Element:	fraud_status
Description:	Identifies status of application before and after fraud prediction service as part of the Spam Filter web service.
Type/Format, Length:	integer
Values:	<p>0 (or Null) = Indicates the application has not been evaluated</p> <p>1 = Not Checked: The Application was not checked because the college has not chosen to opt-in to the service)</p> <p>2 = Pending: The application has been submitted, but has not yet been processed by the prediction service.)</p> <p>3 = Checked Fraud: The prediction service determined that the application is most likely fraudulent.</p> <p>4 = Checked NOT Fraud: The prediction service determined that the application is most likely not fraud.</p> <p>5 = Confirmed Fraud: The college admin has reviewed the application and determined that it is fraudulent.</p> <p>6 = Confirmed NOT Fraud: The college admin has reviewed the application and determined that it is not fraudulent.</p>
Allows Null:	Yes
Default:	
Storage/Usage:	Not downloadable. Does appear in the Report Center data.
Notes:	Not included in downloads; however, the fraud status field does display in the Report Center and in the Full Application reports.
Revision Log:	Implemented 9.28.18 (v.6.2.0)

Noncredit Status

Data Element:	non_credit
Description:	Identifies status of the Noncredit Application path when the Noncredit URL is used to start and submit an application.
Type/Format, Length:	Boolean
Values:	1 = True 0 = False
Allows Null:	Yes
Default:	Set <non_credit> status to = <i>True</i> if the applicant starts and submits the application using the Noncredit URL; otherwise it is set = <i>False</i> for all Standard applications.
Storage/Usage:	All applications that are started (in-progress) & submitted using the Noncredit URL will set this field/flag to "True = noncredit/exempt"; otherwise it = <i>False</i> . A (=True) value triggers new Integrity Flag (81) and sends alert to admissions office. IF the status flag is set (=True), then the set the residency status <res_status> to new value = "N", and residency areas A – D are set to new value = "9".
Notes:	Noncredit App path has a new/different URL. When new URL is used to start & submit Standard application, Noncredit workflow is triggered.
Revision Log:	New field. March 2019

Appendix A: Submission Calculation Logic & Residency Algorithm

This section describes the application calculations that are made once the student has submitted an application for admission. Also included are the requirements for the service that performs these calculations.

Note: Applications submitted with the Noncredit Application URL (<non_credit>= True) are EXEMPT from the Submission Calculation Service calculations.

Overview of Submission Calculations

Once an applicant has submitted an application and it is validated by the software, it is finalized from the applicant's point of view. The applicant's responses cannot be changed. At this point, there are several calculations to be performed before the application is ready for completion and downloading. These include:

- Residency calculations
- Preliminary residency status
- Residency change information
- Residency integrity flags
- Financial aid flag
- AB540 eligibility flag
- Ineligibility-for-admission flag

Note: Any rules you may have created and applied to your application using the Administrator will run after the above calculations are performed, so that the rules can validate against accurate data

Receiving Data from CCCApply

Initially, the Submission Calculation Service will operate only on submitted CCCApply Standard applications. This document identifies all of the data elements that are needed for the various submission calculations. How the Submission Calculation Service will receive these data elements is beyond the scope of this document.

Note: The Submission Calculation Service DOES NOT operate for Noncredit applications (Noncredit URL), or the International application (International URL). The non_credit status flag defaults to =True when the application is started and submitted using the Noncredit URL.

Returning Calculations to CCCApply

The Submission Calculation Service must respond to the CCCApply Service promptly with the results of its calculations, since those results will be used to determine some of the contents of the Links and Opportunities page.

Receiving Data from Other Sources and Returning Calculations to Them

There has been discussion about the Submission Calculation Service having the ability to receive data from other sources (such as SuperGlue, MyPath, XAP CCCApply, or a college that has its own online application) and to provide calculated data to those sources. The design of the Submission Calculation Service should allow this future possibility, but details of the communication with other sources/services are TBD.

Residency Algorithm (Preliminary Residency Calculation)

The residency calculation provided by CCCApply is a preliminary residency calculation only, not an actual or final residency determination. CCCApply does not ask the applicant for proofs of residency in any form. Actual residency determination remains the responsibility of the college to which the student applies. CCCApply does not reveal any indication of residency determination to the applicant. It is up to the colleges to communicate with the applicants about their residency status.

Areas of Residency Qualification

The CCCApply preliminary residency calculation is based upon four areas or categories of evaluation: citizenship, stay and intent, military exemptions, and other exemptions. The student is evaluated in each area separately. The area classifications (referred to as 'classes') are then processed to make the overall preliminary residency calculation.

Citizenship (Area A)

Area A indicates whether the applicant is a U.S. Citizen or an eligible non-U.S. Citizen. An applicant who indicates either U.S. citizenship or a status of Permanent Resident, Temporary Resident/Amnesty, or Refugee/Asylee (along with an unexpired alien registration number) is classified as A1. An applicant indicating an unexpired visa type that is eligible for residency is classified as A2. An applicant not qualifying either as A1 or A2 is classified as A0.

Stay and Intent (Area B)

Area B indicates whether the applicant meets the minimum requirements for duration of stay in California and activities consistent with residency in California. An applicant who meets requirements for residency with no contrary data is classified as B1. An applicant who meets requirements for residency but has some data that needs to be explained or documented is classified as B2. An applicant who does not meet requirements for residency is classified as B0.

Military Exemption (Area C)

Area C indicates whether the applicant is either an eligible active or discharged U.S. Military person or a dependent of such.

C1 = Active military persons and their dependents

C2 = Recently discharged military persons

C0 = All others that are not C1 or C2

To be eligible for priority registration and other benefits, the state legislature has expanded the amount of time that these benefits apply to discharged veterans from one year prior to the RDD to three years prior to the RDD. As of the March 2016 CCCApply release, logic that was previously attached to the actual Military Status field values has been removed and replaced by the value supplied in the Military Discharge date field value.

Other Exemptions (Area D)

Area D indicates whether the applicant qualifies for a special residency exemption. A state college or university employee or dependent, a public school employee, or an eligible seasonal agricultural worker or dependent (not precluded by INS) is classified as D1. All others are classified as D0.

Residency Area Criteria

The criteria and logic for evaluating each area of the residency algorithm are shown in Tables A through D and Figures 1 through 5. Evaluations are based on data elements reflecting the applicant's answers to residency-related questions.

Note: Areas A -D set value = 9 when a Noncredit application is submitted using the Noncredit URL.

Residence Determination Date (RDD)

Residency determination is defined to be ‘as of the day before the term start date’. The day before the term start date is called the Residence Determination Date, or RDD. The RDD is used at several points in the area determination logic specified in Tables A through D.

Residency Integrity Flags

In addition to the preliminary residency determination (Residency Status), the area determination logic produces Residency Integrity Flags that provide additional information to help the colleges in their final residency determinations. Some Integrity Flags indicate why a Residency Status of 2 was assigned; others indicate applicant responses that did not affect the Residency Status but may warrant investigation or documentation.

Integrity flags are two-digit numeric codes, as defined in Table E. They are stored and downloaded in data element ‘residency: res_int_flags’, a string that can contain up to 26 flags.

In addition to their basic function alerting A&R staff to specific information about an applicant’s responses related to residency, Integrity Flags may be used to automate electronic responses back to the applicant with further instructions.

Note: Answers supplied in Areas B and D are in reference to the parent/guardian if the applicant is under age 19 and not independent (i.e., not married, in the military, or emancipated). “Evidence of Intent” rules in the Student Attending Accounting Manual (Chapter 2), based on Title 5 section 54024, specify “under 19 years” as the age criterion, superseding the definition of a “Minor” in general law as under age 18.

Outlines of Residency Area Criteria

Tables A through E, the data elements are in the Residency Table unless a different table is identified (e.g., 'education: element_name' is in the Education Table).

Table A: Outline of Area A (Citizenship)

Step	Evaluation Statement	Data Elements & Logic	If Yes	If No

Residency Status Calculation

Preliminary Residency Status Determination

The residency determination algorithm looks at each area of qualification to determine whether the student meets the residency classification criteria for the purposes of assessing tuition. This preliminary Residency Status calculation is stored in data element 'residency: res_status' as either 1, 2, or 3. Figure 5 shows the preliminary residency determination logic.

Residency Status 1 (Resident): An applicant considered eligible for California residency classification without further proof. The applicant must have the following Area calculations:

- A1 and B1

Residency Status 2 (Possible Resident) # Documentation Required: Any applicant considered eligible for California residency classification provided they can show proof. The applicant must have one of the following Area calculations:

- A1 and B2
- A2 and (B1 or B2)
- C1
- C2 and (B1 or B2)
- D1

Residency Status 3 (Non-Resident): An applicant failing to meet any of the above criteria.

Residency Status N (Noncredit/Exempt): An applicant applied using the Noncredit Application URL; exempt from residency status determination (Default setting; was not included in the Submission Calculation Service.)

Residency Status Change Information

The Residency Algorithm also compares the Residency Status for the current application with the Residency Status determination for the immediately previous application by the same applicant (i.e., user account). If there has been a residency status change, it sets a Residency Status Change flag (data element 'residency: res_status_change') and also stores the date of the different residency status determination (data element 'residency: res_prev_date').

The residency status change information needs to persist in all applications for a particular account until there is another residency status change. Therefore, the 'res_status_change' and 'res_prev_date' values will default to the values in the most recent application submitted by the account, and will be overwritten only if the Residency Status for the current application is different than the Residency Status determination for the immediately previous application.

Review Application & Submission Time Error Messaging

When an applicant reviews their application responses using the *Review Application* feature on the Submission page, if they navigate to a previous tab and change a required response so that it is invalid or has no response, a yellow-shaded semi-circle on the tab displays to indicate that it is not complete once the applicant returns to the *Submission* tab.

Once the response is corrected, the yellow-shaded semi-circle icon changes to display as a green check mark when the applicant returns to the *Review Application* section. The application submission button also displays at the bottom of the screen.

Note: *The application may sometimes respond to a corrected response with an Error message directing the applicant to return to the My Applications page and try again. In this case, once the applicant returns to their application, they will need to navigate directly to the tab where they entered the invalid value, click Continue, and then proceed to the Submission page.*

When an applicant changes required field responses after reaching the *Submission* tab, similar error checking as described above occurs, with these notable exceptions:

- Changing any other required field in the application to have no response results in one of these two error messages:

OR

- In either case, following the error message instructions and correcting the blank or incorrect field value will allow the applicant to move forward and submit their application.

Appendix B: Financial Aid Algorithm

CCCApply facilitates early awareness of financial assistance in two directions. The application process asks questions about the Needs & Interests of the applicant to alert them to the possibility of financial assistance, and offer links to the online California College Promise Grant (fka BOG Fee Waiver) application and FAFSA federal aid application form. Based on responses to the Needs & Interests questions, CCCApply can send notification to financial aid departments at the same time as the application is downloaded by the college so that financial aid departments can begin their processes of contacting and assisting the applicants.

The process of identifying the student and the information required in the notification to the financial aid departments are outlined below.

Financial Aid Referral Flag: Identifying Students for Financial Assistance

If a student answers “yes” to any of the following questions from the Needs & Interests section of the application, the Financial Aid Referral Flag (fin_aid_ref) will be set:

- Financial help to attend college
- Receiving TANF, SSI, or General Assistance
- CalWorks
- EOPS - Extended Opportunity Programs and Services
- Scholarship information
- Veteran’s services

Appendix C: AB540 Waiver Algorithm

After the Preliminary Residency Determination is set, the AB540 Eligibility Flag is set according to the following logic:

1. The response to **both of the following questions** on the Education Page is “Yes”:
 - a. “I have graduated from a California high school or have attained the equivalent thereof, such as a High School Equivalency Certificate, issued by the California State GED Office or a Certificate of Proficiency, resulting from the California High School Proficiency Examination.”
 - b. “I have attended high school in California for three or more years.”
2. AND the Preliminary Residency Determination is NOT “1” (Resident)
3. AND the “Visa Type is Null” OR “Visa Type is T1, T2, T3, T4, T5, U1, U2, U3, U4, U5”.
4. THEN the AB540 Eligibility flag is “Yes”; otherwise it is “No”.

All data items referenced above, as well as the eligibility flag, are available in the Standard *Glue for Apply* data delivery for all colleges.

AB540 Notification to Students

If the AB540 Eligibility flag is “Yes”, then the following links are automatically generated on the Special Links and Opportunities page:

You may be eligible for a special tuition waiver.

Table G. Non-Immigrant Visa Types (No Longer Used)

Education Code section 68130.5 excludes "a nonimmigrant alien within the meaning of paragraph (15) of subsection (a) of Section 1101 of Title 8 of the United States Code." 8 U.S.C. §1101(a)(15) defines an "immigrant" as every alien except non-immigrant aliens holding the visas identified in the table below. Therefore, per part C in the AB540 algorithm described above, holders of visa types listed in Table G are not eligible for AB540.

Visa Class	Non-Immigrant Visa Types
A	Diplomatic and other foreign governmental officials, and their families and employees: A1, A2, A3.
B	Temporary visitors for business and pleasure: B1 and B2.
C	Alien in transit through the U.S.: C1, C1D, and C2. [Although C-3 and C-4 visas are also issued, they are not issued under section 1101(b)(15) which is referenced in EC 68130.5.]
D	Crewmen: D1 and D2.
E	International Traders and Investors: E1, E2.
F	Academic students and their families: F1, F2.
G	Representatives to international organizations and their families and employees: G1, G2, G3, G4, G5.
H	Temporary workers: H1B, H1C, H2A, H2B, H3, H4.
I	Representatives of foreign media and their families: I.
J	Exchange visitors and their families: J1, J2.
K	Fiancé (e) or spouse of a U.S. citizen or dependent of a fiancé (e) or spouse: K1, K2, K3, K4.
L	Intercompany transferees: L1A, L1B, L2.
M	Vocational and language students and their families: M1, M2.
N	Parents and children of the people who have been granted special immigrant status because their parents were employed by an international organization in the United States: N8, N9.
O	Aliens of extraordinary ability: O1, O2, O3.
P	Entertainers and athletes: P1, P2, P3, P4.
Q	Participants in international cultural exchange programs: Q1, Q2, Q3.
R	Religious workers: R1, R2.
S	Informants or witnesses (and accompanying family) on terrorism or organized crime: S5 and S6.
T	Victims of severe form of trafficking in persons: T1, T2, T3, T4. - Removed 12/5/14
U	Crime victims: U1, U2, U3, U4.12/5/14. - Removed 12/5/14
V	Second preference beneficiaries: V1, V2, V3.

Appendix D: Ineligibility Flag and Highest Education Level

This section provides information on the ineligibility flag and highest education level algorithms.

Ineligibility Flag

The ineligibility flag (residency:adm_ineligible) is set based on the following:

Set flag to 1 (**INELIGIBLE for admission**) and set integrity flag 49 on if all of these conditions are true:

1. Applicant will be under 18 on <RDD>
2. <hs_edu_level> = 0 (Not a graduate of, and no longer enrolled in high school).
3. Enrollment status is NOT "Enrolled in college and K-12 at the same time".

Set flag to 2 (**ELIGIBLE with documentation**) and set integrity flag 47 on if all of these conditions are true:

1. Applicant will be under 18 on <RDD>.
2. <hs_edu_level> indicates high school graduation or equivalent (3 - Received high school diploma; 4 - Passed the GED, or received a High School Certificate of Equivalency; 5 - Received a certificate California High School Proficiency; or 6 - Foreign secondary school diploma/certificate of graduation).

Set flag to 1 (**INELIGIBLE for admission**) and set integrity flag 48 on if these conditions are true:

1. Applicant has a B-1 or B-2 Visa type.

Otherwise, set the flag to 0 (**ELIGIBLE for admission**).

Highest Education Level

Set the <highest_edu_level> as follows:

IF <higher_edu_level> = 7 or = 8

THEN set the first character = higher_edu_level

ELSE set the first character = <hs_edu_level>

If <higher_edu_level = 7 or = 8, then set the final four characters = yyyy from <higher_comp_date>

ELSE set the final four characters = yyyy from hs_comp_date (0000 if null).

Note: This element is in the education table: highest_edu_level, but it needs to be 5 char, not 1. Correlates to MIS SB11.

Appendix E: Table of Data Fields

The following table identifies the CCCApply Standard Application and Noncredit Application columns/fields that are downloadable via the CCC Download Client or the by automatic download to your SIS staging table via the SuperGlue College Adaptor.

Note: The Download column indicates if the field is downloadable via the Download Client or not. The Glue column indicates if the field is available to be written directly to your SIS when your school uses the College Adaptor (i.e. SuperGlue). Certain table/field data that is encrypted in via the Download Client is not encrypted via Glue delivery to your school's SIS.

Detailed characteristics of each data element can be found in the main sections of this data dictionary.
