CCCApply International Application Data Field Summary.....200

Account Data in the OpenCCC Apply International Application..... 214

Document Purpose

The CCCApply International Application Specification provides a blueprint for the development and maintenance (upgrade releases) of the application. The content includes application user interface design and logic, and database table information underlying the application.

The CCCApply International Application Specification is intended for two audiences:

- California Community Colleges Tech Center (CCCTC) staff, including software designers, developers, QA technicians, technical writers, and project managers for the CCCApply International Application
- California Community College staff that works with implementation, configuration, usage, and download of data from the CCCApply International Application

Note: Since this document serves two audiences, it is good to note that some information may display as “in-progress” and will be noted as such to avoid confusion.

Overview

The CCCApply International Application is a multipage online form that provides a complete application to a particular California Community College for international students. It is accessed from either each college's portal/website or from cccapply.org.

The CCCApply International Application user interface includes:

- A page for initiating and managing applications (My International Applications)
- Application form pages for the student to enter information to apply to college
- An electronically-signed submission page
- Post-submission pages including a confirmation page and a page of links to system-wide information such as financial aid applications and other related opportunities.

The CCCApply International Application Form also includes several 'smart' features:

- College-configured data and content using the Administrator (terms list, majors list, English proficiency, rules, supplemental questions, etc.)
- Validation logic that prevents conflicting responses and flags situations that colleges might want to investigate
- Other determinations, such as admission eligibility
- Presentation of links based on applicant-entered data
- Auto-population of form data from the applicant's OpenCCC Account

Supporting Resources

The following resources are available to support the CCCApply International Application.

- **cccapply.org:** The cccapply.org website is where students apply to college. For the CCCApply International application, the cccapply.org web site will require modifications similar to what was made for the CCCApply Standard application. We will need to send applicants to the college's website as the starting point for applying for the international application.
- **Help:** The HELP link in the CCCApply International application uses the same help software as the CCCApply Standard application for both students and California Community College staff.
 - **Students :**
 - <http://www.ccchelp.info/> (powered by Get Satisfaction, an online, on-demand, self-service support system)
 - Xerox helpdesk (for account recovery only): (877) 247-4836 or support@openccc.net
 - California Community College Staff:
 - <http://www.ccctechnology.info/> (powered by Get Satisfaction, an online, on-demand, self-service support system)
- Online documentation at <http://cccapplyproject.org/documentation>
 - Data Dictionaries: specifications for the various CCCApply applications, including the BOG Fee Waiver
 - Implementation Documents for the CCCApply applications, include the BOG Fee Waiver
 - User Guides:
 - Administrator: set up users, terms, majors, rules, and supplemental questions
 - Download Client: download student application data to your SIS
 - Report Center: look up applications and run reports
 - Release Notes

User Interface

The User Interface of the CCCApply International application is pictorially represented through wireframe and screen shot images in the following section, in order of the actual online application process. Each section (represented by tabs) must be completed and pass field/page validation before the applicant is allowed to move on to the next section.

The CCCApply International Application is comprised of the following tabbed sections:

- My International Applications Page
- Introduction
- Enrollment Information
- Account/Address Information
- Personal Information
- Contact
- Education
- Visa/Dependents
- SEVIS
- Supplemental Questions
- Consent
- Review Application
- Submit Application

Field Conventions

The following field conventions and display are used throughout the CCCApply International Application.

Conditional Questions and Fields	In general, CCCApply applications will conditionally display only the questions and fields that need to be asked based on responses to earlier questions (including account data elements). The conditions determining whether a question displays is identified in the submitted application database tables section of this document.
Dates	<p>Date questions use menus for month and day, and a text field for the four-digit year.</p> <p>Dates displayed in the user interface are in the format of month day, year (i.e. May 06, 2015).</p> <p>Dates will always be subject to the following basic error checks, in addition to any other error checking required:</p> <p>The day must be valid for the month and year.</p> <p>The year must be four digits and not before 1900.</p> <p>No general maximum date is needed since most (if not all) date fields have error checking for a particular maximum date.</p>
Language Toggle	The CCCApply application pages include a language toggle similar to the one in the former XAP applications. However, the language toggle in CCCApply affects only the language of the field 'hover help'. All other application language always displays in English.

	This document does not currently provide Spanish translations for the 'hover help'.

Application Page Flow

Applicants are first presented and must sign in to the OpenCCC Federated ID system before, or immediately after, navigating to CCCApply. An introduction page may display before the applicant signs in, prompting the user to either create an account or sign in.

- If the applicant click Create Account, the OpenCCC Create Your OpenCCC Account page displays, and the user is prompted to create an OpenCCC account.
- When the applicant clicks Sign In, the OpenCCC Sign In page displays, and the user is prompted to enter their Username and Password.

My International Applications Page

Once logged in, the applicant views the My International Applications page.

Note: District applications are distinguished by displaying on both the My International Applications page and the Enrollment page of the application. A district application is an application to a college which has more than one college in the district. If there is more than one row in the college table with the same district_id as the current college, then it is a district application. The current college is the college from which the applicant initiated the application process.

CCCApply International Application Pages

Application pages (tabs) have the following dependencies as outlined in the table below.

Note: Tabs appear be grayed out until the page is available based on the table conditions below.

Page	Depends on this condition
Introduction	No dependency
Enrollment	User clicks Start Application on Introduction Page.
Account/Address	No additional dependency
Personal Information	No additional dependency
Contact Information	No additional dependency
Educational	No additional dependency
Visa and Dependent Information	No additional dependency
SEVIS	Displayed only if the Visa Type = F1 or M1
Supplemental Questions	No additional dependency
Request for Consent	No additional dependency
Review Application	All previous pages must be complete for the confirmation button to appear on the screen.

Page	Depends on this condition
	If the applicant reaches this page and then navigates back to a previous page and changes any data, then the Review Application page will be set to incomplete. In this situation the user must re-confirm the application is complete.
Submit Application	Review Application must be complete

Automatic Field Population

Some fields are auto-populated in the CCCApply International application.

The Account/Address Information fields auto-populate with the following data from the applicant's OpenCCC account:

- CCCID
- Last Name
- First Name
- Middle Initial
- SSN
- SSN Last 4 digits
- SSN Type
- Email Address
- Date of Birth
- Mainphone, extension and authorization for text
- Second phone, extension and authorization for text
- Street address 1 and 2
- City
- State
- Postalcode
- Non US Province/State
- Non US Postal Code
- Country

Note: The *Current Mailing Address* and *Non U.S. Permanent Address* fields can be populated from the user's OpenCCC Account *Permanent Address* fields by clicking the checkbox that indicates the addresses are the same.

US Address verification for US mailing addresses is the same process used in CCCApply Standard Application. US addresses are validated using the **CASS** (U.S. Postal Service) address validation system. This includes the addresses entered in the OpenCCC Account Creation process.

The following two auto-populated fields refer to an in-progress table where data is stored temporarily until the student submits their application:

The **app_id** is automatically generated when the row is first inserted into the table.

The **college_id** is set from the college table. It is the MIS code for the college being applied to.

My International Applications

The My International Applications page is presented once the user has signed into their OpenCCC account. From My International Applications, they can:

1. Start a new application.

2. Resume or Delete an in-progress application.
3. View a submitted application.

Enrollment Information

The Enrollment Information page includes three drop-down list fields and a freeform entry field.

1. Term Applying For
2. Intended Major or Program of Study
3. Educational Goal
4. Freeform field: "Enter your intended 4 year major if different than the one you selected above:"

The three drop-down field values are defined by each individual college in the Administrator. See the Administrator Guide for details on configuring these values.

Enrollment Page Validation

Applicants cannot apply to the same college for the same term. For district applications, an applicant may apply to only one college within the district for a given term. The following logic will enforce this rule. The following steps should occur when the Continue button is clicked:

1. Perform all other verifications for the enrollment screen to ensure all data is valid.
2. Find all colleges for the district. Find all college rows with the same district_id as the current college. If there is only one, it is not a district application. If there is more than one, continue.
3. Check for In-Progress applications. For each college_id other than the college_id of the current college, check if there is an in-progress application for the user for the same term. If true, this is an error that will render the page incomplete and not allow the user to complete the application (see error message below).
4. Check for submitted applications. For each college_id other than the college_id of the current college, check if there is a submitted application for the user for the same term. If true, this is an error that will render the page incomplete and not allow the user to complete the application (see error message below).

In-Progress Error Message	“You may apply to only one college in the <district_name> for the term you selected. You already have an in-progress application to another college in this district. Click on My Applications to see what other application you have started.”
Submitted Application Error Message	<p>“You may apply to only one college in the <district_name> for the term you selected. You already submitted an application to another college in this district. Click on My Applications to view your submitted application or select a different term for this application.”</p> <p> Note: <district_name> in the above messages is the name field from the district table.</p>

Account and Mailing Information

The Account/Address Information page fields are auto-populated with values the applicant entered when they created their OpenCCC Account.

When the user selects the Current Mailing Address check box to indicate that their mailing address is the same as their permanent address in their OpenCCC Account, the fields for this text box collapse and are not displayed.

Supplemental Questions

The supplemental questions page will function the same way as it does in the CCCApply Standard application. The setup for the page will use an XML file for its definition and will use the Administrator to import the page. Using supplemental questions is optional for each college. See the Administrator Guide and the Supplemental Questions Guide for details on configuring supplemental questions for the CCCApply applications.

When supplemental questions are configured by the college to be used in the CCCApply International application, the Supplemental Questions page appears prior to the Consent page.

Consent

The Consent page presents the California Community Colleges Chancellor's Office consent language and two radio buttons for the student to select:

- I consent
- I do not consent

Request for Consent to Release Information

[Cambiar A Español](#)

Request for Consent to Release Information

The community colleges you attend and the Chancellor's Office of the California Community Colleges request your help. We ask that you agree to allow us to release necessary personal information about you to various agencies and organizations so we can do research, plan programs and offer special services to you (such as transfer opportunity information or state financial aid). If you do agree to give your consent, your information will not be sold, used for commercial purposes, released to the public, or given to other government agencies for purposes of determining benefits (other than financial aid), except where specifically required by law. In addition, if you do consent to release of your information, those organizations and agencies to which your information is given are prohibited by law from using it for any unauthorized purpose or releasing it to anyone else. If you do not give your consent, personal information about you will not be shared with other organizations or agencies except where allowed by law. You should also know that answering "no" to this question will not prevent release of certain "directory information" about you. To learn more about directory information or how to block its release, see the [Privacy Policy](#).

I authorize the Chancellor's Office, California Community Colleges, and the community colleges I am attending to release necessary personal information contained in my education records, including my Social Security number, for the purposes described in the Full Statement of Consent.

Submit Your Application

[Cambiar A Español](#)

You are about to submit your application to Unicollege.
NO CHANGES can be made to your application once it is submitted.

California state law* allows you to submit your application and residency information online with an electronic signature verification. Your completion of this page will provide the necessary verification for electronic submission. The security and privacy of the information in your submitted application are protected as described in the CCCApply Privacy Policy.

* Section 54300 of subchapter 4.5 of chapter 5 of division 6 of title 5 of the California Code of Regulations.

By Checking here, I, Ethel Ealanor Egghead III, declare that:

- All of the information in this application pertains to me.
- Under penalty of perjury, the statements and information submitted in this online admission application are true and correct.
- I understand that falsification, withholding pertinent data, or failure to report changes in residency may result in District action.
- I understand that I may be required to submit additional documents to complete my admission, such as proof of English, proof of finances, or school transcripts. A list of required documents is available at Unicollege, and on the college's website.
- I understand that all materials and information submitted by me for purposes of admission become the property of Unicollege.

Additional Requirements

The following additional requirements are under consideration for implementation of the CCCApply International Application.

Advance Payment

Note: This requirement will not be implemented in the first iteration/release. The Steering Committee will work with the SSPSC to discuss an integrated payment processing system into the SS Portal to be used for multi-purposes, such as transcripts, admission application fees, and more.

Advance payment is required before submitting an application. Forms of payment include:

1. Credit Card. Investigate use of Paypal or some similar third party payment system.
2. Check. Would this need to be some form of a certified check?
3. Wire transfer.
4. **Assuming any form of payment will need to be in US currency?**

This requirement will require the ability for college staff to mark an in-progress application to indicate payment has been received and cleared so the application can be submitted. Once the payment has been recorded notification to the applicant is required.

Business Process Management

In the XAP system, there is an optional Workflow Manager which can be purchased and used with the older International application. In the new CCCApply International Application, Business Process Management software will be used for workflow management. This section describes the requirements for this process.

Application Downloads

Application data will be available for colleges to download using the same technology and Download client software that is used for the CCCApply and the OpenCCC BOG Fee Waiver application.

The download process is documented in the CCCApply Download Client guide found on our project site at <http://cccapplyproject.org/documentation#user-guides>

Administrator

The functions available in the Administrator for the CCCApply International Application include:

1. Term management
2. Majors management
3. English Proficiency
4. Supplemental Questions
5. Rules
6. Reset Downloads
7. User Authorization

The English Proficiency information is unique to the CCCApply International application and details can be found in the Administrator Guide located here:

<http://cccapplyproject.org/documentation#user-guides>

Reporting

All submitted applications from CCCApply International Application (and previously-submitted applications from the older XAP International application) will be available in the Report Center. The Report Center provides the following report types:

1. Public standard reports.
2. Public lookup reports such as name with a link to view the full application.
3. Ad Hoc reporting for any reportable field on the application.

Individual authorization for use of the Report Center is controlled in the Administrator. Authorization restricts a user to viewing applications for their specific college or district. See the Report Center guide located here:

<http://cccapplyproject.org/documentation#user-guides>

CCCApply International Application Support Database Tables

Similar to the CCCApply Standard Application, the CCCApply International Application makes use of several in-progress tables, where data is stored in real-time as the applicant enters values and saves the application. The in-progress table data is then stored in a submitted application table upon application submission.

The following in-progress support tables are common and used to store in-progress applicant data for both the CCCApply Standard Application and the CCCApply International Application:

- school
- college
- district
- authz

The following in-progress support tables have their own international “version,” unique to the CCCApply International Application. These tables are updated from college configuration in the Administrator.

- term (same definition as standard application)
- major (same definition as standard application)
- college_rules (Rules - same definition as standard application)
- supp_question_content (Supplemental Questions - same definition as standard application)
- college_eng_prof_test_lookup (English Proficiency - new table unique to International Applications)

The in-progress English Proficiency table is also updated by college configuration in the Administrator and is used to support the English Proficiency section of the Education Page. The English Proficiency support table includes the following columns:

1. college_id - character(3), **primary key**
2. help_text - character varying (512)
3. toefl_ibt – boolean
4. toefl_pbt – boolean
5. ielts – boolean
6. itep – boolean
7. eiken – boolean
8. pearson – boolean
9. native_english_speaker – boolean
10. attending_language_school – boolean
11. attending_us_college – boolean
12. other – Boolean
13. toefl_ibt_score – boolean
14. toefl_pbt_score – boolean
15. ielts_score – boolean
16. itep_score – boolean
17. eiken_score – boolean
18. pearson_score – boolean
19. native_english_speaker_score – boolean
20. attending_language_school_score – boolean
21. attending_us_college_score – boolean
22. other_score – boolean

Once the applicant submits the CCCApply International Application, all values from the in-progress tables are transferred to single submitted_intl_application table, where the data is available for download and reporting.

Note: Some fields are never available for download or reporting, such as social security numbers, sexual orientation, transgender identification, etc. Instead, these fields are encrypted, and are only available, anonymously and with no connection to any other application data, for reporting at the California Community College Chancellor's Office (CCCO). See the Download Client guide and the table at the end of this specification to see which data is or is not available for download and reporting.

CCCApply International Submitted Application Database Tables

When a CCCApply International Application is in progress, data entered is written to individual “in-progress” tables defined by their category and not accessible. When the application is finally submitted, all the data is written to a single submitted_intl_application table that contains all of the data from the in-progress tables (with the exception of protected information, which is encrypted never viewable by the colleges, such as social security number, sexual orientation, and transgender status). The submitted_intl_application table is the data source for reporting and downloads.

Each submitted CCCApply International Application field/column presents information in the following format, grouped by flow through the application:

Data Element:	Column name in the submitted application database
Description:	General description of this data's purpose
Format, Length:	Data type (i.e. boolean, varchar, etc.) and max length stored in the database for the column
Values:	All possible values stored for this column
Allows Null:	Whether this column/field allows null values or not
Default:	Any default value for the column/field
Usage:	Information (if available) about how this data is used by the CCCO
Notes:	Any additional notes about this column/field
Question Text:	The exact text of the question as it appears on the Application page. Angle brackets indicate a variable, such as <date:RDD> or <CollegeName>.
Conditions:	Conditions under which the question appears. “Always” indicates a question that appears in all situations.
Additional Text:	Instructions, legal statements, and/or other text that appears in smaller gray type.
Response Options:	A description or list of the options available to the user. For menus and some radio buttons, includes actual stored values plus menu/button text: e.g., ‘F = Female’.
Hover Help:	The help text that appears when the cursor hovers over the entry field. All questions have hover help.
Pop-Up Help:	Help text that appears in a pop-up when hyperlinked text is clicked.
Field Error Check:	Error checking for basic validity, such as 5 or 9 digits for ZIP code.

Page Error Check:	Error checking for incompleteness (required questions not answered) and for contradictory answers to two or more questions.
XAP field:	The XAP column name for this field, if applicable
Revision log:	Date of the most recent revision of this column.

CCCApply International Application System Tables

The data element tables in this section support a variety of system fields in the International application.

Application ID

The `app_id` is the primary key of each of the tables. This field is a bigint and will be seeded starting with the value 10000. It is automatically incremented by the system for the application table. This field is initially set when the row is written for the application table and the same value is used when all other rows are written for a specific application including the submitted application table. For all tables other than the application table it becomes the foreign key.

Data Element:	<code>app_id</code>
Description:	The unique identifier for a single application to college.
Format, Length:	Bigint
Values:	Unique number assigned by the system for every application.
Allows Null:	No
Default:	None
Usage:	Used to uniquely identify a single application.
Notes:	
Revision Log:	~~

Application Confirmation Number

Data Element:	<code>confirmation</code>
Description:	Confirmation Number assigned by the system when the application is submitted. This is a unique identifier for an application.
Data Type/Format:	Varchar 30
Format, Length:	character varying(30),
Values:	The value of the confirmation number will be a concatenation of "INT-" + <code>app_id</code> . Example: INT-10765.
Allows Null:	No

Default:	None
Usage:	For colleges and applicants, this is the number that identifies a particular submitted application. It is displayed on Application Confirmation page and elsewhere.
Notes:	Application confirmation displays on the 'My Applications' page after an application is submitted.
Revision Log:	~~

College Name

Data Element:	college_name
Description:	Name of college student is applying to.
Format, Length:	varchar, 50
Values:	Text string
Allows Null:	No
Default:	None
Usage:	Displayed in many places in the online application process.
Notes:	College table. Required and customizable.

California Community College ID

<i>Data Element:</i>	ccc_id
<i>Description:</i>	<p>The unique identifier for a single user's account. This identifier is assigned during account creation in OpenCCC. This field is passed as part of a submitted application to each college and is stored in the college Student Information System (SIS). This field can be used for student authentication when a student signs in at a college. It can be passed as an attribute to student statewide services so the service can verify the student has an OpenCCC account and perform automatic sign in. This field will also be passed as an MIS field.</p> <p>The user's unique CCCID for Federated Identity.</p>
<i>Format, Length:</i>	Character varying(8)
<i>Values:</i>	<p>The format of the ccc_id is:</p> <p>Positions 1 - 3: AAA thru ZZZ (Sequentially assigned beginning with AAA)</p> <p>Positions 4 - 7: 0001 thru 9999 (Sequentially assigned beginning with 0001 for each value in positions 1-3)</p>

	Position 8: For future expansion if all values become exhausted.  Note: In positions 1-3, “I” and “O” are not used to avoid confusion with “0” and “1”.
<i>Allows Null:</i>	No. This is a system assigned field and is not entered by the user.
<i>Default:</i>	System assigned.
<i>Usage:</i>	Used to uniquely identify an OpenCCC user account. This account can be used to apply to any participating college in the new CCCApply. It is also used for any additional student statewide services which use the ccc_id for authentication. Stored for use in Federated ID. Other possible uses TBD.
<i>Notes/Constraints:</i>	System-generated unique identifier. System will support expansion of CCCID to 8 characters (XXXXNNNN). Populates the CCCApply Standard and International applications and the BOG Fee Waiver applications from the applicant's OpenCCC Account.
<i>Prompt Text:</i>	None After account creation, the CCCID displays next to the logged-in user's name for the OpenCCC Account, CCCApply Standard application, CCCApply International application, and BOG Fee Waiver application.

Account/Address Information Tables

The Account/Address Information tab includes read-only contact information from the student's OpenCCC Account including:

- Current full name (first, middle, and last)
- Permanent address (street, city, state/province, zip/postal code, and country)
- Previous or alternate name(s)
- Main phone (plus extension, if applicable, and text authorization or non-authorization)
- Second phone (plus extension, if applicable, and text authorization or non-authorization)
- Email
- Social Security Number (encrypted, if supplied)
- Date of birth

This read-only information can be edited when the student clicks the Edit Account button, which opens up their OpenCCC Account for editing. After making changes, the student can save and return to the Account/Address Information tab in the CCCApply International application.

The tables in the Account/Address Information section are broken down into two groups:

- Data elements from the OpenCCC Account that are submitted with each submitted CCCApply International application
- Data elements that support the fields the student completes in the CCCApply International application on the Account/Address Information tab

OpenCCC Account Information on the Account/Address Information Tab

The tables in this section provide data element information for the student's OpenCCC Account. This information is included in each submitted CCCApply International application.

‘Colleges Attended’ Tables

The number of College/University question sets that will appear depends on the response to Number of Colleges Attended.

To minimize redundancy, this document provides tables for the College/University 1 question set only. For College/University 2, College/University 3, and College/University 4, everything is the same as for College/University 1 except:

- Wherever it occurs in the tables, “College/University 1” will be replaced by “College/University 2”, “College/University 3”, or “College/University 4” as appropriate.
- The question set for College/University 2 will appear when Number of Colleges Attended is ‘2’, ‘3’, ‘4’, or ‘5 or more’.
- The question set for College/University 3 will appear when Number of Colleges Attended is ‘3’, ‘4’, or ‘5 or more’.
- The question set for College/University 4 will appear when Number of Colleges Attended is ‘4’ or ‘5 or more’.

Sorting Colleges Attended

When there are two or more colleges, they can be listed in any order by the applicant. However, in the database they will be sorted and saved in order of attendance, with College/University 1 the most recently attended. The primary sorting date will be Attendance Ended; the secondary sorting date will be Attendance Began. If two or more colleges have the same Attendance Ended date and the same Attendance Began date, it doesn’t matter which comes before the other in the sorting.
