

For libraries interested in hiding subject headings that are non-LC (i.e. those that are not in English such as are found in WMS records) there is a Primo VE normalization rule to do this. You will need the following txt file as well:

SubjectDisplayField_ShowLCSHonly.txt file

What the bib record looks like before the normalization rule is applied:

Details	
Title	The US-South Korea alliance : meeting new security challenges
Creator	Snyder, Scott, 1964- >
Subject	United States -- Foreign relations -- Korea (South) > Korea (South) -- Foreign relations -- United States > National interest -- United States > National interest -- Korea (South) > Diplomatic relations > National interest > Korea (South) > United States > Außenpolitik > Sicherheitspolitik > USA > Südkorea > nuclear weapons -- nonproliferation -- USA -- South Korea > climate change -- South Korea > peacekeeping operations -- peacebuilding -- South Korea > USA -- foreign policy -- development aid -- humanitarian aid -- South Korea >
Description	How can the United States and South Korea best cooperate to address new security challenges? Can the US-ROK alliance serve to advance South Korea's interests and at the same time help the US to more effectively pursue its own global and regional security objectives? In the context of these questions, the authors explore the possibilities for enhanced cooperation in both traditional and nontraditional spheres.
Contents	Expanding the US-South Korea alliance / Scott Snyder -- The maritime relationship / Michael McDevitt -- Counterterrorism / Kevin Shepard -- Nuclear nonproliferation / Fred McGoldrick -- Outer space / James Clay Moltz -- Pandemics and biological threats / James L. Schoff -- Climate change / Heejun Chang and Lily House-Peters -- Peacekeeping / Balbina Y. Hwang -- Postconflict stabilization and reconstruction / Michael J.

What the bib record looks like after the normalization rule:

Publisher	Boulder, Colo. : Lynne Rienner Publishers
Creation Date	2012
Format	vii, 293 pages : illustrations ; 24 cm
Source	Library Catalog
Identifier	LC : 2011043124;

If libraries would like to implement this, here are instructions to do so:

1. On the Display Fields page (Configuration Menu > Discovery > Display Configuration > Manage Display and Local Fields), select Add display field from the Add field drop-down list to open the Define a Display Field page.
2. Select Subject from the drop-down list.
3. Right click to edit the default Marc21 Normalization Rule for display.
4. Delete all contents of the normalization rule and replace with the entire text from the attached document, SubjectDisplayField_ShowLCSHonly.txt
5. Select Save.
6. Go back to the main page for Manage Display and Local Fields and select Apply Rules.
7. Records in Primo VE will now only display LSCH headings.
