# Brainstorm: SIS Integration

- What is possible now with advisor card functionality?
  - MyPath tracks MyPath
  - Local completion efforts are not reflected as completed tasks in MyPath
- What is possible with Glue SIS integration?
  - Tasks completed in local systems show as complete in MyPath
  - Nudges/Tasks can direct students based on local system data
  - MyPath can inform local student status (e.g. priority registration)
- What is needed by colleges to assist students?
  - Is anything missing from the list?
  - What are the priorities for your college?

## MyPath Goals for Integrating with SIS
