12:10 – 12:30   Chancellor's Office update

ASWG future may be continued by the CCC Accessibility Center with the Accessibility Advisory Committee (ACAC), and the Accessibility Modules Working Group (AMWG) charters, pending funding.

Regarding funding, there is not one big bucket of funding. iEPI and other programs will have individual group funding. Thus every item has to go through a lot of legal and business review. Transparency and Cooperation is required to move forward.

Laurie's concern is that the CCCCO provides support to move through. We can provide modules but must have the CCCCO do their part to move it forward. It is the responsibility of the CCCCO to communicate it out, stand behind it, and push for adoption.
