Count Response

1	I noticed that they all have very strange email addresses. The applications I have reviewed had the the same ip addresses. Admissions just informed me there are possibly 5 more applications. I am awaiting the confirmation numbers. I will send them to Patty.
1	Many don't have a SS# For some, out of state addresses No high school or college information Strange email addresses Movie character names Lived in CA for 2-years Birthdate on 1/1/1998 repeated Same IP address Some identified as foster youth and homeless Generally, the application is not complete
1	Most of them are using address outside of California. Some of them have Chinese first name and last name using 6010 W Century Blvd as street address and Los Angeles as city. A few of don't even have a first name!
1	Names contain repeated letters SSN not null No residency Most have no gender State does not match city Only have one application in CCCApply
1	No address or invalid USPS address, no phone number, suspect email domain, no HS or invalid HS
1	The applicant names all sounds Latin (Lorem Ipsum generator or something). All choose the same major program (15200.AAT in our school's case),
1	The applications have the same distinguishing characteristics as the ones we received before the blocks, which are: Residency issues: applicants indicate they have lived in CA for 2 yrs, but voted & paid taxes outside CA in the last 2 years. Prior schooling: applicants indicate first time in college and they did not graduate or receive a GED and were not home schooled Email addresses are much different from applicant name
1	The e-mail account is using domain @gmx.com. The address is not accurate, wrong zip code for state being used (02345 for a California address).
1	We are able to identify them by their matching information on the apps. Same date of births (usually 01/06/1995) and matching addresses (2213 11th St) they usually come in bulks of 5-10 apps.
1	email addresses and out state mailing addresses
1	n/a
1	they seem to use out of state addresses that do not exist
